SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Reviews.

Absorption
  jejunum, polyunsaturated fat 219–224

Acetaldehyde adducts
  immunoblotting, alcoholic heart muscle disease 263–268

Acetylcholine
  resistance artery, diabetes 519–524

Acute gastric erosions
  cat, human pepsins 47–50

Acute myocardial ischaemia
  natriuretic peptides, exercise 551–556

Acute renal failure
  bile duct ligation, glomerular thromboxane A2 synthesis 39–45
  S-Adenosylcysteine
    brain, vitamin B12 471–477
  S-Adenosylhomocysteine
    methylation ratio, brain 73–79
  S-Adenosylmethylionine
    brain, vitamin B12 471–477
    methylation ratio, brain 73–79

Adrenal glands
  metadrenaline 533–542

Adrenalectomy
  metadrenaline 533–542

Adrenaline
  bronchoconstriction 439–446
  platelet aggregation, cardiopulmonary bypass 269–275
  α2-Adrenoceptors
    vascular reactivity, diabetic nephropathy 421–426

β-Adrenoceptors
  G-protein α- and β-subunits, atrium 571–580
  Adrenocorticotropic hormone
    regulation of secretion 4–7

Ageing
  Kupffer cells, endotoxin 211–217

β-Agonists
  angiotensin-converting enzyme 433–437
  ‘New Zealand asthma mortality epidemic’ 14–17

Airway epithelial cells
  neutrophil chemotaxis, cigarette smoke 377–344

Airways resistance
  capsaicin, fenspiride 325–330

Alanine
  catabolism, growth factors 285–292

Albumin
  glomerular filtration rate, diabetes 413–419
  Albumin synthesis
    feeding, stable isotopes 235–242

Albminuria
  blood pressure, elderly 185–190

Alcoholic heart muscle disease
  acetaldehyde adducts, immunoblotting 263–268

Alkali-soluble protein
  skeletal muscle, weight loss 479–484

Allopurinol
  ischaemia, kidney 359–364

Amiloride
  platelet aggregation, endothelin 277–283

Amino acid requirements
  protein turnover 597–606*
Amino acids
  McArdle’s disease 687–693
Amylin
  roles in physiology, pathology and therapeutics 7–12
Anaplerosis
  McArdle’s disease 687–693
Angina pectoris
  natriuretic peptides, exercise 551–556
Angiotensin
  β2-agonists 433–437
  DNA and RNA synthesis, fibroblasts 557–562
  lithium, tubular reabsorption 351–358
Angiotensin-converting enzyme
  β2-agonists 433–437
1,5-Anhydroglucitol
  total parenteral nutrition, renal tubular function 203–210
Anti-inflammatory drugs
  α1-antitrypsin, neutrophils 331–336
Antibodies
  acetaldehyde adducts, alcoholic heart muscle disease 263–268
Antidiuretic hormone
  hepatocytes, diabetes 671–674
  urine concentration, parathyroid hormone 197–201
Antioxidant defences
  cigarette smoking 485–489
α1-Antitrypsin
  neutrophils, sulphonamides 331–336
Apolipoprotein B-100
  renal tract, betaines 25–27
Betaines
  bacteria, renal tract 25–27
Bile duct ligation
  glomerular thromboxane A2 synthesis, acute renal failure 39–45
Blood flow
  venous occlusion plethysmography 643–649
Blood pressure
  albuminuria, elderly 185–190
  endothelin 509–517
  head-down tilt, spectral analysis 87–93
  heart transplantation, spectral analysis 95–102
  insulin resistance, dietary fructose 719–725
  kidney, genetics 665–670

Brain
  ‘New Zealand mortality epidemic’, β-agonists 14–17
  sympathetic nervous system 439–446
Atherosclerosis
  microalbuminuria, transvascular albumin leakage 629–633
  vascular permeability factor, endothelium 141–147
Atrial natriuretic peptide
  angina pectoris, exercise 551–556
  glomerular filtration rate, diabetes 413–419
  haemodynamics, cardiac pacing 165–172
  renin–angiotensin system 81–86
  studies in New Zealand 18–21
Atrium
  G-protein α- and β-subunits, β-adrenoceptor blockade 571–580
Autonomic nervous system
  heart rate variability, spectral analysis 103–109
  heart transplantation, spectral analysis 95–102
  microcirculation, heart failure 501–508*
Bacteria
  renal tract, betaines 25–27
Baroreflex sensitivity
  heart rate variability, spectral analysis 103–109
  power spectral analysis, heart rate 1–2
  statistical dependence 651–655
Breathing pattern
  altitude, newborn infants 345–350
Breathlessness
  morphine inhalation, exercise 447–452
5-Bromodeoxyuridine
  cell cycle, cell proliferation 119–130*
Bronchoconstriction
  sympathetic nervous system 439–446
Subject Index
n-Butyrate
gangliosides, colonic cancer 491-499

Calcium
endothelin, protein kinase C 277-283
parathyroid hormone, urine concentration 197-201
Calcium absorption
intestine, stable strontrium 243-244
Calcium pump
membrane fluidity, hyperlipidaemia 307-310
Calphostin C
platelet aggregation, endothelin 277-283
Cancer
alkali-soluble protein, skeletal muscle 479-484
colon, gangliosides 491-499
Capillary
haemodynamics, heart failure 501-508*
Capsaicin
airways resistance, fenspiride 325-330
Carbohydrate metabolism
regulation, amylin 7-12
Cardiac pacing
haemodynamics, atrial natriuretic peptide 165-172
Cardiomyopathy
acetaldehyde adducts, immunoblotting 263-268
Cardiopulmonary bypass
platelet aggregation, adrenaline 269-275
Cardiopulmonary receptors
head-down tilt, spectral analysis 87-93
Carotid baroreceptors
plasma volume, orthostatic hypotension 463-470
Catabolism
total parenteral nutrition, growth factors 285-292
Catechol-o-methyltransferase
metadrenaline 533-542
Cell cycle
assessment of cell proliferation 119-130*
Cell lineage
myocytes, retrovirus 257-262
Cell proliferation
methods of assessment 119-130*
Chemokines
infection 393-400
Cholesterol esterification
pregnancy 311-318
Cholinesterase
nitric oxide, endothelium 111-117
Chronic obstructive pulmonary disease
fenspiride 325-330
motor control, tracking task 453-461
Cigarette smoking
cytokines, antioxidant defences 485-489
neutrophil chemotaxis, airway epithelial cells 337-344
Cirrhosis
venous responsiveness, noradrenaline 525-531
Citrate
McArdle's disease 687-693
Clinical research
progress in New Zealand 3-27
Clonidine
vascular reactivity, diabetic nephropathy 421-426
Collecting tubule
rubidium uptake, insulin resistance 293-299
Colon
ion transport, platelet-activating factor 51-57
Colonic cancer
gangliosides, n-butyrate 491-499
Confocal microscopy
gap junctions, confocal microscopy 257-262
Congestive heart failure
continuous positive airway pressure, haemodynamics 173-178
Connexin
gap junctions, confocal microscopy 257-262
Continuous ambulatory peritoneal dialysis
diabetes, insulin action 427-432
Continuous positive airway pressure
haemodynamics, congestive heart failure 173-178
respiratory efforts 707-712
Contractile properties
skeletal muscle, growth hormone deficiency 67-71
Control of breathing
altitude, newborn infants 345-350
tracking task, chronic obstructive pulmonary disease 453-461
Copper stable isotopes
kinetic studies, Wilson's disease 727-732
Coproporphyria
uroporphyrin, haem arginate 365-369
Coronary artery flow
exercise, nitrates 635-641
Corticotrophin
regulation of secretion 4-7
Cyclic GMP
glomerular filtration rate, atrial natriuretic peptide 413-419
Cyclo-oxygenase
endothelium, hypertension 611-622
Cytokines
cigarette smoking 485-489
protein synthesis, dietary fats 59-66
sepsis, plasminogen activator 587-594
Daltroban
bile duct ligation, acute renal failure 39–45
proteinuria, blood pressure 623–627
Danish Nutrition Council
trans fatty acids 375–392
Decompression illness
cardiorespiratory abnormalities 595–596
Diabetes
endothelin, resistance artery 519–524
goiter 245–255*
glomerular filtration rate, atrial natriuretic peptide 413–419
glycosylated haemoglobin, semi-carbazide-sensitive amine oxidase 675–679
insulin action, continuous ambulatory peritoneal dialysis 427–432
islet amyloid 7–12
neuropathy, flow motion 191–196
vascular reactivity, clonidine 421–426
vasopressin receptor, hepatocytes 671–674
Dietary fats
protein synthesis, cytokines 59–66
Dietary fructose
insulin resistance, blood pressure 719–725
Dihydroxyphenylglycol
metadrenaline 533–542
Direct analysis
fat mass, dual-energy X-ray absorptiometry 319–324
Disseminated intravascular coagulation
vascular smooth muscle, thrombin 149–157
Diurnal cycling
amino acid requirements 597–606*
DNA
skeletal muscle, weight loss 479–484
DNA synthesis
fibroblasts, angiotensin IV 557–562
Doppler echocardiography
left ventricular filling, brain natriuretic peptide 159–164
Doppler ultrasound
coronary artery flow, nitrates 635–641
Dual-energy X-ray absorptiometry
body composition 319–324
Edrophonium
nitric oxide, endothelium 111–117
Eicosanoids
endothelin, hypertension 611–622
Elderly
albuminuria, blood pressure 185–190
Electrolytes
blood pressure, genetics 665–670
Endothelial cells
nitric oxide, L-arginine 135–139
Endothelin
blood pressure 509–517
focal glomerular sclerosis, low-protein diet 29–37
hypertension 509–517
platelet aggregation, protein kinase C 277–283
Endothelin receptors
focal glomerular sclerosis, low-protein diet 29–37
Endothelium
cholinesterase, nitric oxide 111–117
insulin-dependent diabetes mellitus 245–255*
microcirculation, heart failure 501–508*
resistance arteries, hypertension 611–622
resistance artery, diabetes 519–524
vascular permeability factor, atherosclerosis 141–147
Endothelium-derived relaxing factor
pregnancy 607–610
resistance arteries, hypertension 611–622
Endotoxin
cytokines, dietary fats 59–66
Kupffer cells, ageing 211–217
Energy expenditure
glucose-induced thermogenesis 543–550
Epidermal growth factor
mucosal healing 401–403
Erythrocytes
membrane function, hyperlipidaemia 307–310
metabolic acidosis, inorganic phosphate 405–412
Exercise
breathlessness, morphine inhalation 447–452
coronary artery flow, Doppler ultrasound 635–641
natriuretic peptides, angina pectoris 551–556
Family studies
kidney, hypertension 665–670
Fat mass
dual-energy X-ray absorptiometry, direct analysis 319–324
Feeding
albumin synthesis, stable isotopes 235–242
Fenspiride
airway resistance, capsaicin 325–330
Ferritin
urological disease 701–706
Fetus
lipoprotein metabolism 311–318
Fibrinolysis
sepsis, plasminogen activator 587–594
Flow cytometry
assessment of cell proliferation 119–130*
Flow motion
neuropathy, diabetes 191–196
Focal glomerular sclerosis
endothelin, low-protein diet 29–37
Folate
methyltransferases, brain 73–79
Free fatty acids
kinetics, insulin 681–686
Fructose
insulin resistance, blood pressure 719–725
Frusemide
renin secretion, nitric oxide 657–663
Fumarate
McArdle's disease 687–693

Gangliosides
colon cancer, n-butyrate 491–499
Gap junctions
connexin, confocal microscopy 257–262
Gas chromatography–mass spectrometry
very-low-density lipoprotein apolipoprotein
B-100, density 225–233

Glucose
atrial natriuretic peptide, glomerular filtration rate 413–419
thermogenesis, splanchnic and leg tissue 543–550
Glucose intolerance
glucose transport, skeletal muscle 301–306
Glucose metabolism
insulin action, continuous ambulatory peritoneal dialysis 427–432
Glucose transport
skeletal muscle, glucose intolerance 301–306
Glycerol
insulin 681–686
Glycogenolysis
McArdle's disease 687–693
Glycolysis
inorganic phosphate, metabolic acidosis 405–412
Glycosylated haemoglobin
diabetes, semi-carbazide-sensitive amine oxidase 675–679
Goto–Kakizaki rat
glucose transport, skeletal muscle 301–306
G-protein
α- and β-subunits, atrium 571–580
Growth hormone
alanine, catabolism 285–292
Growth hormone deficiency
skeletal muscle, contractile properties 67–71
GTPase-activating protein
neurofibrin, neurofibromatosis 581–585
Haem arginate
uroporphyrin, coproporphyria 365–369
Haemodynamics
cardiac pacing, atrial natriuretic peptide 165–172
continuous positive airway pressure, congestive heart failure 173–178
head-down tilt, spectral analysis 87–93
microcirculation, heart failure 501–508*
Haemostasis
cardiopulmonary bypass, adrenaline 269–275
Head-down tilt
haemodynamics, spectral analysis 87–93
Heart
gap junctions, connexin 257–262
Heart failure
heart rate variability, spectral analysis 103–109
metadrenaline 533–542
microcirculation, haemodynamics 501–508*
Heart rate
head-down tilt, spectral analysis 87–93
heart transplantation, spectral analysis 95–102
power spectral analysis, autonomic nervous system 1–2
Heart rate variability
spectral analysis, baroreflex sensitivity 103–109
Heart transplantation
blood pressure, spectral analysis 95–102
Heat shock protein
infection 393–400
Heparin
vascular smooth muscle, thrombin 149–157
Hepatocytes
vasopressin receptor, diabetes 671–674
Hering–Breuer reflexes
altitude, newborn infants 345–350
Hirudin
platelet aggregation, adrenaline 269–275
vascular smooth muscle, thrombin 149–157
Human pepsins
acute gastric erosions, cat 47–50
Hyperaldosteronism
  hypertension, hereditary 563–570
Hyperalimentation
  1,5-anhydroglucitol, renal tubular function 203–210
Hyperlipidaemia
  calcium pump, membrane fluidity 307–310
Hyperphosphataemia
  metabolic acidosis, uraemia 405–412
Hypertension
  albuminuria, elderly 185–190
  endothelin 509–517
  hereditary, hyperaldosteronism 563–570
  kidney, genetics 665–670
  metadrenaline 533–542
  resistance arteries, endothelium 611–622
  rubidium uptake, nephron 293–299
Hypomethylation
  brain, vitamin B12 73–79, 471–477
Hypoxia
  vagal reflexes, newborn infants 345–350
Idiopathic pulmonary fibrosis
  superoxide dismutase 371
Infarct artery patency
  thrombolytic therapy 21–24
Infection
  chemokines 393–400
Inflammation
  urinary ferritin 701–706
  inflammatory bowel disease
    platelet-activating factor, synthesis de novo 713–717
Inhalation
  morphine, breathlessness 447–452
Inorganic phosphate
  metabolic acidosis, uraemia 405–412
Insulin
  free fatty acids, kinetics 681–686
  diabetes, continuous ambulatory peritoneal dialysis 427–432
Insulin resistance
  blood pressure, dietary fructose 719–725
  glucose transport, skeletal muscle 301–306
  obesity and hypertension, amylin 7–12
  rubidium uptake, nephron 293–299
  very-low-density lipoprotein apolipoprotein B-100, obesity 225–233
Insulin sensitivity
  insulin action, continuous ambulatory peritoneal dialysis 427–432
  insulin-like growth factor-I alanine, catabolism 285–292
  free fatty acids, kinetics 681–686
  muscle strength, growth hormone deficiency 67–71
Interleukin-1
  Kupffer cells, endotoxin 211–217
Interleukin-6
  cigarette smoking 485–489
  fibrinolysis, sepsis 587–594
  Kupffer cells, endotoxin 211–217
Interleukin-8
  infection 393–400
Internal mammary graft
  exercise, nitrates 635–641
Intestinal trefoil factor
  mucosal healing 401–403
Intestine
  calcium absorption, stable strontium 243–244
  intraperitoneal insulin
    metabolic effects, continuous ambulatory peritoneal dialysis 427–432
Ischaemia
  platelet-activating factor, distal colon 51–57
  Kupffer cells
    kidney, allopurinol 359–364
Jejunum
  absorption, polyunsaturated fat 219–224
Ki-67
  cell cycle, cell proliferation 119–130*
Kidney
  blood pressure, genetics 665–670
  ischaemia, allopurinol 359–364
  81mKr ventilation–perfusion inequality 179–184
  Kupffer cells
    endotoxin, ageing 211–217
Laser Doppler flowmetry
  neuropathy, diabetes 191–196
Lean mass
  dual-energy X-ray absorptiometry, direct analysis 319–324
Left ventricular filling
  Doppler echocardiography, brain natriuretic peptide 159–164
Leucocytes
  sodium–potassium-dependent adenosine triphosphatase, potassium 695–700
Leukotrienes
  Kupffer cells, endotoxin 211–217
Lipoproteins
  pregnancy 311–318
Lithium
  tubular reabsorption, angiotensin II 351–358

</table>
Nitric oxide synthase
endothelial cells, L-arginine 135–139
septic shock 131–133
N^G^-Nitro-L-arginine methyl ester
renin secretion, macula densa 657–663
Nitrogen balance
amino acid requirements 597–606*
Nitrous oxide
methylation ratio, brain 73–79
Noradrenaline
bronchoconstriction 439–446
vascular reactivity, diabetic
nephropathy 421–426
venous responsiveness, cirrhosis 525–531
Normetadrenaline
sympathetic nervous system 533–542
Norrie disease
metadrenaline 533–542
Obesity
very-low-density lipoprotein apolipoprotein B-100, insulin resistance 225–233
Oedema
microcirculation, heart failure 501–508*
Orthophosphate
metabolic acidosis, uraemia 405–412
Orthostatic hypotension
carotid baroreceptors, plasma volume 463–470
Osteoporosis
research in Auckland 12–14
Ouabain
sodium-potassium-dependent adenosine triphosphatase, lymphocytes 695–700
Oxidative metabolism
McArdle's disease 687–693
Oxygen uptake
glucose-induced thermogenesis 543–550
Parathyroid hormone
urine concentration, arginine vasopressin 197–201
Patent foramen ovale
decompression illness 595–596
Pepsins
acute gastric erosions, cat 47–50
Permeability
distal colon, platelet-activating factor 51–57
Phaeochromocytoma
metadrenaline 533–542
Phenylephrine
vascular reactivity, diabetic nephropathy 421–426
Plasma volume
carotid baroreceptors, orthostatic hypotension 463–470
Plasminogen activator
fibrinolysis, sepsis 587–594
Plasminogen activator inhibitor 1
fibrinolysis, sepsis 587–594
Platelet aggregation
cardiopulmonary bypass, adrenaline 269–275
endothelin, protein kinase C 277–283
Platelet-activating factor
ion transport, distal colon 51–57
synthesis de novo, inflammatory bowel disease 713–717
Platelet-derived growth factor
endothelium, atherosclerosis 141–147
Polyamine
cell cycle, cell proliferation 119–130*
Polyol
total parenteral nutrition, renal tubular function 203–210
Polyunsaturated fat
jejunal function 219–224
Porphobilinogen deaminase
uroporphyrin, haem arginate 365–369
Postmenopausal osteoporosis
research in Auckland 12–14
Potassium
sodium-potassium-dependent adenosine triphosphatase, lymphocytes 695–700
Potassium channels
endothelium, hypertension 611–622
Power spectral analysis
heart rate, blood pressure 1–2
Pre-ascitic cirrhosis
venous responsiveness, noradrenaline 525–531
Pre-eclampsia
nitric oxide 607–610
Pregnancy
lipoprotein metabolism 311–318
nitric oxide 607–610
Proliferating cell nuclear antigen
cell cycle, cell proliferation 119–130*
Prostaglandins
Kupffer cells, endotoxin 211–217
Protein
hypomethylation, vitamin B₁₂ 471–477
Protein kinase C
endothelin, platelet aggregation 277–283
Protein synthesis
cytokines, dietary fats 59–66
Protein turnover
amino acid requirements 596–606*
Proteinuria
blood pressure, thromboxane receptor antagonists 623–627
Proximal convoluted tubule
rubidium uptake, insulin resistance 293–299
Subject Index

Pulmonary artery pressure
fenspiride 325–330

Renal tract
bacteria, betaines 25–27

Renal tubular function
total parenteral nutrition,
1,5-anhydroglucitol 203–210

Renin–angiotensin system
β₂-agonists 433–437
natriuretic peptides 81–86

Renin secretion
macula densa, nitric oxide 657–663

Resistance arteries
diabetes, glycosylated haemoglobin 675–679

Respiratory efforts
upper airway pressure 707–712

Retrovirus
cell lineage, myocytes 257–262

RNA
skeletal muscle, weight loss 479–484

RNA synthesis
fibroblasts, angiotensin IV 557–562

Rubidium uptake
nephron, insulin resistance 293–299

Secretion
jejenum, polyunsaturated fat 219–224

Semi-carbazide-sensitive amine oxidase
diabetes, glycosylated haemoglobin 675–679

Sepsis
chemokines 393–400
fibrinolysis, plasminogen activator 587–594
nitric oxide synthase 131–133

Serum lipids
insulin action, continuous ambulatory peritoneal dialysis 427–432

Sialic acid
colonic cancer, n-butyrate 491–499

Skeletal muscle
alkali-soluble protein, weight loss 479–484
catabolism, growth factors 285–292
contractile properties, growth hormone deficiency 67–71
glucose transport, glucose intolerance 301–306
glucose-induced thermogenesis 543–550

Sleep apnoea–hypopnoea
respiratory efforts 707–712

Sodium
nephron, insulin resistance 293–299
venous responsiveness, noradrenaline 525–531
Sodium–potassium-dependent adenosine triphosphatase
nephron, insulin resistance 293–299

potassium, lymphocytes 695–700

Spectral analysis
blood pressure, heart transplantation 95–102
haemodynamics, head-down tilt 87–93
heart rate variability, baroreflex sensitivity 103–109

Splanchnic tissues
glucose-induced thermogenesis 543–550

Stable isotopes
albumin synthesis, feeding 235–242
very-low-density lipoprotein B-100, hepatic secretion 225–233

Statistical dependence
baroreflex sensitivity 651–655

Staurosporine
platelet aggregation, endothelin 277–283

Steroid osteoporosis
research in Auckland 12–14

Strontium
calcium absorption, intestine 243–244

Subacute combined degeneration
hypomethylation, vitamin B₁₂ 471–477

Subcutaneous insulin
metabolic effects, continuous ambulatory peritoneal dialysis 427–432

Sulphonamides
α₁-antitrypsin, neutrophils 331–336

Superoxide dismutase
idiopathic pulmonary fibrosis 371

Surgery
alkali-soluble protein, skeletal muscle 479–484

Sympathetic nervous system
bronchoconstriction 439–446
metadrenaline 533–542

Tachycardia
cardiac pacing, atrial natriuretic peptide 165–172

Thermogenesis
glucose, splanchnic and leg tissue 543–550

Thick ascending limb of Henle
rubidium uptake, insulin resistance 293–299

Thrombin
platelet aggregation, endothelin 277–283
vascular smooth muscle, endotoxic shock 149–157

Thrombolytic therapy
left ventricular function, myocardial infarction 21–24

Thromboxane A₂
glomerular synthesis, acute renal failure 39–45

Contents continued

Long-term fructose versus corn starch feeding in the spontaneously hypertensive rat by M. R. van der Schaaf, J. A. Joles, A. van Tol and H. A. Koornans 719–725

Correction

Physiology and pathophysiology of heart rate and blood pressure variability in humans: is power spectral analysis largely an index of baroreflex gain? by P. Sleight, M. T. La Rovere, A. Mortara, G. Pinna, R. Maestri, S. Leuzzi, B. Bianchini, L. Tavazzi and L. Bernardi, 733
