Volume 89

SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Reviews.

- N*-Acetylglucosaminyltransferases
 - expression, colonic neoplasms 397–404
- Acute mountain sickness
 - high altitude, intracranial pressure 201–204
- Acute myeloid leukaemia
- MTG8* locus, translocation breakpoints 215–218
- Acute myocardial infarction
 - neutrophils, platelet-activating factor 171–176
- Acute-phase protein synthesis
 - liver, vaccination 389–396
- Adenosine
 - isolated blood vessels, cirrhosis 227–232
- Adhesion molecules
 - neutrophils, acute myocardial infarction 171–176
- Adipocytes
 - lipolysis, weight reduction 421–429
- Adrenaline
 - antecedent hypoglycaemia, adaptation 359–366
 - thermogenesis, meal frequency 349–357
- β -Adrenoceptor blockade
 - G-protein, atrium 487–495
- β_2 -Adrenoceptor agonists
 - renin–angiotensin system, hypoxia 273–276
- Adrenoceptors
 - lipolysis, weight reduction 421–429
- α -Adrenoceptors
 - thermoregulation, gender 219–225
- Age
 - cutaneous vasoconstrictor response, inspiratory gasp 223–237
- Aging
 - selenium, thyroid hormones 637–642
- Airway epithelium
 - fibroblast mitogenesis, insulin-like growth factor I 611–617
- Albumin
 - fatty acid availability, nephrotic syndrome 417–420
- Aminonucleoside nephrosis
 - myosin heavy-chain isoform, smooth muscle 45–52
- Ammoniogenesis
 - metabolic acidosis, chronic renal failure 643–650
- Anaemia
 - epidermal growth factor, Goettingen minipigs 453–458
- Angiotensin
 - β_2 -adrenoceptor agonists, hypoxia 273–276
- Angiotensin II
 - atrial natriuretic peptide, nitric oxide release 527–531
 - volume regulation, conscious dogs 19–25
- Angiotensin-converting enzyme
 - exertional heat stroke 261–265
- Antecedent hypoglycaemia
 - catecholamines, adaptation 359–366
- Antidromic vasodilatation
 - calcitonin gene-related peptide, immunoblockade 565–573
- Antioxidants
 - nitric oxide, smoking 343–348
 - reperfusion, liver transplantation 329–332
- Aorta
 - atherosclerosis, fish oil 497–504
- Aortic distensibility
 - cerebrovascular disease, blood pressure 247–253
- Arginine
 - nitric oxide, blood pressure 183–190
- Arginine vasopressin
 - lithium clearance, proximal tubule 27–36
 - renal sensitivity, dietary salt 37–43
 - salt restriction, dehydration 305–310
- Arrhythmia
 - myofilaments, calcium sensitizers 59–67
- Arterial compliance
 - cerebrovascular disease, blood pressure 247–253
- Asthma
 - bronchial hyper-reactivity, ozone 619–624
- Atherosclerosis
 - coronary artery wall mechanics, intravascular ultrasound 239–246
 - hypocholesterolaemia, fish oil 497–504

- ATP synthesis
mitochondria, peripheral vascular disease 581–590
- Atrial natriuretic peptide
angiotensin II, nitric oxide release 527–531
- Atrial natriuretic peptide receptor
nitric oxide release, proximal tubular cells 527–531
- Atrium
G-protein, β -adrenoceptor blockade 487–495
- Autonomic failure
hypotension, octreotide 367–373
- Autonomic function
heart rate, diabetes mellitus 557–564
- Baroreflex gain
power spectral analysis, heart rate variability 555–556
- Bethanechol
isolated blood vessels, cirrhosis 227–232
- Bile
lipoprotein 121–128
- Bio-impedance analysis
nutritional status, surgical patients 651–658
- Bio-impedance spectroscopy
nutritional status, surgical patients 651–658
- Blood flow
calcitonin gene-related peptide, immunoblockade 565–573
nitric oxide, vitamin E 343–348
tissue injury, diabetes 467–474
- Blood groups
gastric mucins, peptic ulcer 405–415
- Blood pressure
aortic distensibility, cerebrovascular disease 247–253
calcitonin gene-related peptide, immunoblockade 565–573
maternal diabetes, animal model 255–260
nitric oxide, vasculature 177–182
nitric oxide, arginine 183–190
- Bone marrow
epidermal growth factor, Goettingen minipigs 453–458
- Bosentan
endothelin receptor, liver 575–579
- Breathing
chronic obstructive pulmonary disease 625–632
- Bronchial hyper-reactivity
ozone, asthma 619–624
- Butyrates
glycosyltransferases, colonic neoplasms 397–404
- Caffeine
tolerance, orthostasis 475–480
- Calcitonin gene-related peptide
antidromic vasodilatation, immunoblockade 565–573
- Calcium oxalate urolithiasis
urinary prothrombin F1, crystal aggregation 533–541
- Calcium sensitizers
myofilaments, arrhythmia 59–67
- Calorimetry
breathing, chronic obstructive pulmonary disease 625–632
- Capillary function
tissue injury, diabetes 467–474
- Capillary structure
tissue injury, diabetes 467–474
- Cardiac transplantation
insulin-like growth factor I, autocrine role 53–57
- Cardiotonics
myofilaments, arrhythmia 59–67
- Cardiovascular system
sympathetic-adrenal activity, thermogenesis 349–357
- Cataract
tryptophan metabolism 591–599
- Catecholamines
antecedent hypoglycaemia, adaptation 359–366
caffeine, orthostasis 475–480
lipolysis, weight reduction 421–429
- Cathepsin B
C2C12 myotubes, interleukin-6 431–439
- Cathepsin L
C2C12 myotubes, interleukin-6 431–439
- CD10
neutrophils, lipopolysaccharide 83–89
- CD14 receptor
neutral endopeptidase 24.11, lipopolysaccharide 83–89
- β -Cell function
hypopituitary, growth hormone 321–328
- Cell nucleus
transcription and replication 13–18
- Cell proliferation
small intestine, epidermal growth factor 117–120
- Cerebrovascular disease
aortic distensibility, blood pressure 247–253
- Cholecystokinin
radioimmunoassay, satiety 375–381
- Cholesterol metabolism
high-density lipoprotein, paediatric tumours 505–510
- Chromosome 8
translocation breakpoints, acute myeloid leukaemia 215–218

- Chromosome 21
translocation breakpoints, acute myeloid leukaemia 215–218
- Chronic heart failure
heart rate variability, inotrope stimulation 155–164
- Chronic obstructive pulmonary disease
breathing 625–632
- Chronic renal failure
metabolic acidosis, renal hypertrophy 643–650
- Chronic ulcerative colitis
interleukin- 1β , intracolonic release 521–526
- Cirrhosis
vasodilatation, signal transduction 227–232
- Claudication
peripheral vascular disease, muscle bioenergetics 581–590
- Clearance
 ^{99m}Tc -Diethylenetriaminepenta-acetic acid, microvascular permeability 191–200
- Cold pressor test
diastolic function, diabetes 461–465
- Collagen
fibroblasts, osteoporosis 69–73
- Colonic neoplasms
glycosyltransferases, expression 397–404
- Colonic transit time
modelling, constipation 129–135
- Constipation
colonic transit time, modelling 129–135
- Coronary artery
elasticity, intravascular ultrasound 239–246
- Coronary bypass graft
non-peptide antagonist, vasopressin receptors 481–485
- Coronary heart disease
lipoprotein metabolism, smoking 333–342*
- Crystal aggregation
calcium oxalate urolithiasis, urinary prothrombin F1 533–541
- Cutaneous vasoconstrictor response
inspiratory gasp, gender difference 223–237
- Cyclic AMP
lipolysis, weight reduction 421–429
platelets, pregnancy 91–99
- Cytosolic magnesium
platelets, sodium 293–298
- Dehydration
salt restriction, arginine vasopressin 305–310
- Diabetes
blood flow, tissue injury 467–474
diastolic function, cold pressor test 461–465
glucose transporter, hypertension 109–116*
growth retardation, animal model 255–260
microcirculation 3–12*
vascular dysfunction, endothelium 459
- Diabetes mellitus
autonomic function, heart rate 557–564
- Diabetic microangiopathy
pathophysiology 3–12*
- Diabetic neuropathy
parasympathetic function, heart rate 557–564
- Dialysis exchange rate
albumin-fatty acid affinity, nephrotic syndrome 417–420
- Diaphragm
electromyography, chronic obstructive pulmonary disease 625–632
- Diastolic function
diabetes, cold pressor test 461–465
hypoxaemia, Doppler analysis 165–169
- Diet
dehydration, arginine vasopressin 305–310
muscle necrosis, weaning 447–452
- Dietary salt
kidney, arginine vasopressin 37–43
 ^{99m}Tc -Diethylenetriaminepenta-acetic acid clearance, microvascular permeability 191–200
- Digoxin
sodium-potassium ATPase, cystic fibrosis 277–284
- D-Dimer
fibrin, thrombogenesis 205–214*
- Distal tubule
lithium clearance, arginine vasopressin antidiuresis 27–36
- Dobutamine
heart rate variability, chronic heart failure 155–164
- Doppler analysis
diastolic function, hypoxaemia 165–169
- Doppler echocardiography
diastolic function, diabetes 461–465
- Dystrophin
muscle necrosis, weaning 447–452
- Eccentric contraction
muscle necrosis, weaning 447–452
- Eicosanoids
intracolonic release, ulcerative colitis 521–526
- Elasticity
coronary artery, intravascular ultrasound 239–246
- Electromyogram
negative pressure, upper airway 441–445
- EMD 57033
myofilaments, arrhythmia 59–67
- Endopeptidase 24.11
inhibition, vasoactive intestinal peptide 267–271

- Endothelial cell markers
 exertional heat stroke 261–265
- Endothelin receptor
 non-peptide antagonist, liver 575–579
- Endothelium
 vascular dysfunction, diabetes 459
- Endotoxaemia
 protein synthesis, glutamine 311–319
- Energy
 sympathetic nervous system, food intake 145–154
- Enterocytes
 protein synthesis, sepsis 311–319
- Epidermal growth factor
 anaemia, Goettingen minipigs 453–458
 cell proliferation, small intestine 117–120
- Epithelial cells
 fibroblast mitogenesis, insulin-like growth factor I 611–617
- Erythropoiesis
 epidermal growth factor, Goettingen minipigs 453–458
- Exercise
 gastric peptides, maltodextrin 137–143
 heart rate variability, chronic heart failure 155–164
 heat stroke, endothelial cell markers 261–265
 hypotension, octreotide 367–373
- Exertional heat stroke
 endothelial cell markers 261–265
- Extracellular water
 bio-impedance, surgical patients 651–658
- Fatty acid availability
 albumin, nephrotic syndrome 417–420
- Fibrin
 D-dimer, thrombogenesis 205–214*
- Fibroblast mitogenesis
 airway epithelium, insulin-like growth factor I 611–617
- Fibroblasts
 collagen, osteoporosis 69–73
- Fish oil
 atherosclerosis, hypocholesterolaemia 497–504
- Flow cytometry
 neutrophil shape change 549–554
- Fluorescence-activated cell sorter
 neutrophil shape change 549–554
- Food intake
 sympathetic nervous system, thermogenesis 349–357
- Foot ulceration
 blood flow, diabetes 467–474
- Free oxygen radicals
 neutrophils, acute myocardial infarction 171–176
- Free radicals
 reperfusion, liver transplantation 329–332
- Galactosyltransferases
 expression, colonic neoplasms 397–404
- Gallstones
 lipoprotein 121–128
- Gastric mucins
 peptic ulcer, blood groups 405–415
- Gastrin
 exercise, maltodextrin 137–143
- Gender
 cutaneous vasoconstrictor response, inspiratory gasp 223–237
 thermoregulation, α -adrenoceptors 219–225
- Genioglossus
 negative pressure, electromyogram 441–445
- Glucose metabolism
 neuropeptide Y, acute effects 543–548
- Glucose oxidation
 multiple organ failure, sepsis 601–609
- Glucose storage
 multiple organ failure, sepsis 601–609
- Glucose tolerance
 hypopituitary, growth hormone 321–328
 maternal diabetes, animal model 255–260
- Glucose transporter
 hypertension, insulin resistance 109–116*
- Glutamine
 protein synthesis, sepsis 311–319
- Glutathione peroxidase
 thyroid hormones, aging 637–642
- Glycogenolysis
 peripheral vascular disease, magnetic resonance spectroscopy 581–590
- Glycoproteins
 gastric mucins, peptic ulcer 405–415
- Goettingen minipigs
 anaemia, epidermal growth factor 453–458
- Growth hormone
 β -cell function, hypopituitary 321–328
 glucose utilization, multiple organ failure 601–609
- Growth retardation
 maternal diabetes, animal model 255–260
- Haemodynamics
 caffeine, orthostasis 475–480
- Heart
 noradrenaline, food intake 145–154
- Heart failure
 diabetes, cold pressor test 461–465

- Heart rate
 autonomic function, diabetes mellitus 557–564
- Heart rate variability
 inotrope stimulation, chronic heart failure 155–164
 power spectral analysis, baroreflex gain 555–556
- Heat stroke
 endothelial cell markers 261–265
- Hepatitis
 interstitial collagenase, tissue inhibitor of metalloproteinase-1 75–81
- High altitude
 intracranial pressure, acute mountain sickness 201–204
- High-density lipoprotein
 triacylglycerol, paediatric tumours 505–510
- Hormone-sensitive lipase
 lipolysis, weight reduction 421–429
- Hormones
 blood pressure, arginine 183–190
- Hydration
 lithium clearance, proximal tubule 27–36
- Hydroxyanthranilic acid
 metabolism, cataract 591–599
- Hydroxytryptophan
 metabolism, cataract 591–599
- Hyperglycaemic glucose clamp
 glucose utilization, multiple organ failure 601–609
- Hyperlipoproteinaemias
 bile 121–128
- Hypertension
 endothelin, liver 575–579
 insulin resistance, glucose transporter 109–116*
- Hypoalbuminaemia
 fatty acid availability, nephrotic syndrome 417–420
- Hypocholesterolaemia
 atherosclerosis, fish oil 497–504
- Hypoglycaemia
 catecholamines, adaptation 359–366
- Hypopituitary
 β -cell function, growth hormone 321–328
- Hypotension
 autonomic failure, octreotide 367–373
- Hypothalamus
 glucose metabolism, neuropeptide Y 543–548
- Hypothermia
 metabolism, α -adrenoceptor antagonists 219–225
- Hypoxaemia
 diastolic function, Doppler analysis 165–169
- Hypoxia
 renin–angiotensin system, hypoxia 273–276
- Idiopathic juvenile osteoporosis
 collagen, fibroblasts 69–73
- Immunoblockade
 calcitonin gene-related peptide, vasodilatation 565–573
- Indirect calorimetry
 glucose utilization, multiple organ failure 601–609
- Inflammation
 airway narrowing, ozone 619–624
- Inotrope
 myofilaments, arrhythmia 59–67
- Inotrope stimulation
 heart rate variability, chronic heart failure 155–164
- Inspiratory gasp
 cutaneous vasoconstrictor response, gender difference 223–237
- Insulin
 glucose metabolism, neuropeptide Y 543–548
 hypopituitary, growth hormone 321–328
- Insulin resistance
 glucose transporter, hypertension 109–116*
 maternal diabetes, animal model 255–260
- Insulin-like growth factor I
 autocrine role, cardiac transplantation 53–57
 fibroblast mitogenesis, airway epithelium 611–617
- Interleukin-1 β
 intracolonic release, ulcerative colitis 521–526
- Interleukin-2
 proliferative response, lymphocytes 511–519
- Interleukin-6
 proteolysis, C2C12 myotubes 431–439
- Internal mammary artery
 non-peptide antagonist, vasopressin receptors 481–485
- Interstitial collagenase
 lipocytes, hepatitis 75–81
- Intestinal calcium absorption
 stable strontium 107
- Intestinal permeability
 polyethylene glycol, water loading 299–303
- Intracolonic release
 interleukin-1 β , ulcerative colitis 521–526
- Intracranial pressure
 high altitude, acute mountain sickness 201–204
- Intravascular ultrasound
 coronary artery, atherosclerosis 239–246
- Ionized magnesium
 magnesium sulphate, migraine 633–636
- Isogravitational perfusion heterogeneity
 lung transplantation, single-photon emission computerized tomography 285–291

- Kidney
 arginine vasopressin, dietary salt 37–43
 noradrenaline, food intake 145–154
- Kynurenic acid
 metabolism, cataract 591–599
- Kynurenine
 metabolism, cataract 591–599
- Lactulose
 intestinal permeability, water loading 299–303
- Large granular lymphocytes
 proliferative response, lipoproteins 511–519
- Laser Doppler flowmetry
 inspiratory gasp, gender difference 223–237
 microangiopathy, diabetes 467–474
- Left ventricular diastolic function
 diabetes, cold pressor test 461–465
- Lipid peroxidation
 atherosclerosis, fish oil 497–504
 reperfusion, liver transplantation 329–332
- Lipocytes
 interstitial collagenase, tissue inhibitor of metalloproteinase-1 75–81
- Lipolysis
 adipocytes, weight reduction 421–429
- Lipopolysaccharide
 neutral endopeptidase 24.11, neutrophils 83–89
- Lipoprotein
 bile 121–128
- Lipoprotein metabolism
 coronary heart disease, smoking 333–342*
- Lipoprotein receptors
 proliferative response, lymphocytes 511–519
- Lipoproteins
 proliferative response, lymphocytes 511–519
- Lithium
 proximal tubule, arginine vasopressin antidiuresis 27–36
- Liver
 endothelin receptor, non-peptide antagonist 575–579
 noradrenaline, food intake 145–154
 protein synthesis, vaccination 389–396
- Liver fibrosis
 interstitial collagenase, tissue inhibitor of metalloproteinase-1 75–81
- Liver transplantation
 reperfusion, antioxidants 329–332
- Lung transplantation
 isogravitational perfusion heterogeneity, single-photon computerized emission tomography 285–291
- Lymphocytes
 proliferative response, lipoproteins 511–519
- T-lymphocytes
 proliferative response, lipoproteins 511–519
- Magnesium sulphate
 ionized magnesium, migraine 633–636
- Magnetic resonance spectroscopy
 muscle bioenergetics, peripheral vascular disease 581–590
- Malnutrition
 protein synthesis, wound healing 383–388
- Maltodextrin
 exercise, gastric peptides 137–143
- Mannitol
 intestinal permeability, water loading 299–303
 lithium clearance, proximal tubule 27–36
- Mathematical stress test
 antecedent hypoglycaemia, adaptation 359–366
- mdx* mice
 muscle necrosis, weaning 447–452
- Metabolic acidosis
 renal hypertrophy, chronic renal failure 643–650
- Metabolic rate
 neonatal respiration, vagi nerves 101–105
- Metabolism
 thermoregulation, α -adrenoceptor antagonists 219–225
- Microangiopathy
 tissue injury, diabetes 467–474
- Microcirculation
 inspiratory gasp, gender difference 223–237
 non-insulin-dependent diabetes 3–12*
- Microvascular permeability
 ^{99m}Tc-Diethylenetriaminepenta-acetic acid, clearance 191–200
- Migraine
 magnesium sulphate, ionized magnesium 633–636
- Mitochondrial ATP synthesis
 peripheral vascular disease, magnetic resonance spectroscopy 581–590
- Modelling
 colonic transit time, constipation 129–135
- Monoclonal antibody
 calcitonin gene-related peptide, vasodilatation 565–573
- MTG8* locus
 translocation breakpoints, acute myeloid leukaemia 215–218
- Mucins
 peptic ulcer, blood groups 405–415
- Multiple organ failure
 sepsis, glucose utilization 601–609
- Muscle bioenergetics
 peripheral vascular disease, magnetic resonance spectroscopy 581–590

- Muscle necrosis
weaning, diet 447–452
- Myofilaments
calcium sensitizers, arrhythmia 59–67
- Myosin heavy-chain isoform
smooth muscle, aminonucleoside
nephrosis 45–52
- Myotubes
proteolysis, interleukin-6 431–439
- C2C12 myotubes
proteolysis, interleukin-6 431–439
- Negative pressure
upper airway, electromyogram 441–445
- Neonatal respiration
vagi nerves, oxygen uptake 101–105
- Nephrotic syndrome
fatty acid availability, albumin 417–420
- Neuropeptide Y
acute effects, glucose metabolism 543–548
- Neutral endopeptidase 24.11
neutrophils, lipopolysaccharide 83–89
- Neutral metalloendopeptidase blockers
vasoactive intestinal peptide,
metabolism 267–271
- Neutrophil shape change
flow cytometry, fluorescence-activated cell
sorter 549–554
- Neutrophils
neutral endopeptidase 24.11,
lipopolysaccharide 83–89
platelet-activating factor, acute myocardial
infarction 171–176
sputum, ozone 619–624
- Nitric oxide
arginine, blood pressure 183–190
vasculature, blood pressure 177–182
vasodilatation, cirrhosis 227–232
vitamin E, smoking 343–348
- Nitric oxide release
atrial natriuretic peptide, angiotensin II
527–531
- Nitroprusside
isolated blood vessels, cirrhosis 227–232
- Non-peptide antagonist
endothelin receptor, liver 575–579
vasopressin receptor, human arteries 481–485
- Noradrenaline
blood flow, vitamin E 343–348
food intake, energy 145–154
- Nucleoskeleton
transcription and replication 13–18
- Nutrition
thyroid hormones, aging 637–642
- Nutritional status
bio-impedance, surgical patients 651–658
- Obesity
lipolysis, weight reduction 421–429
- Octreotide
hypotension, autonomic failure 367–373
- Oligosaccharides
glycosyltransferases, expression 397–404
- Orthostasis
caffeine, tolerance 475–480
- Osmolality
angiotensin II, volume regulation 19–25
- Osteoporosis
collagen, skin fibroblasts 69–73
- Ouabain
cytosolic magnesium, platelets 293–298
sodium–potassium ATPase, cystic
fibrosis 277–284
- Oxidative metabolism
peripheral vascular disease, magnetic resonance
spectroscopy 581–590
- Oxygen uptake
neonatal respiration, vagi nerves 101–105
- Ozone
bronchial hyper-reactivity, asthma 619–624
- Paediatric tumours
high-density lipoprotein, triacylglycerol 505–510
- Palatoglossus
negative pressure, electromyogram 441–445
- Parasympathetic function
heart rate, diabetic neuropathy 557–564
- Peptic ulcer
gastric mucins, blood groups 405–415
- Peripheral vascular disease
muscle bioenergetics, magnetic resonance
spectroscopy 581–590
- Phenotype
myosin heavy-chain, smooth muscle 45–52
- Phentolamine
thermoregulation, metabolism 219–225
- Platelet-activating factor
neutrophils, acute myocardial
infarction 171–176
- Platelets
cyclic AMP, pregnancy 91–99
cytosolic magnesium, sodium 293–298
- Polyethylene glycol
intestinal permeability, water loading 299–303
- Posture
antecedent hypoglycaemia, adaptation 359–366
- Power spectral analysis
heart rate variability, baroreflex gain 555–556

- Pre-eclampsia
 cyclic AMP, platelets 91–99
- Pregnancy
 cyclic AMP, platelets 91–99
- Proinsulin
 hypopituitary, growth hormone 321–328
- Proliferative response
 lymphocytes, lipoproteins 511–519
- Prostanoids
 atherosclerosis, fish oil 497–504
- Proteasome
 C2C12 myotubes, interleukin-6 431–439
- G-protein
 serine variants, atrium 487–495
- Protein synthesis
 enterocytes, sepsis 311–319
 wound healing, malnutrition 383–388
- Protein turnover
 vaccination 389–396
- Proteinuria
 metabolic acidosis, chronic renal failure 643–650
- Proteolysis
 interleukin-6, C2C12 myotubes 431–439
- Proteolysis-inducing factor
 C2C12 myotubes 431–439
- Prothrombin activation peptide F1
 calcium oxalate urolithiasis, crystal aggregation 533–541
- Prothrombin F1
 calcium oxalate urolithiasis, crystal aggregation 533–541
- Proximal tubular cells
 nitric oxide release, atrial natriuretic peptide 527–531
- Proximal tubule
 lithium clearance, arginine vasopressin antidiuresis 27–36
- Pulmonary artery
 atherosclerosis, fish oil 497–504
- Pulmonary reflexes
 vagi nerves, oxygen uptake 101–105
- Pulse wave velocity
 cerebrovascular disease, blood pressure 247–253
- Radioimmunoassay
 cholecystokinin, satiety 375–381
- Regulation of breathing
 vagi nerves, oxygen uptake 101–105
- Renal hypertrophy
 metabolic acidosis, chronic renal failure 643–650
- Renin
 β_2 -adrenoceptor agonists, hypoxia 273–276
- Reperfusion
 liver transplantation, antioxidants 329–332
- Replication
 nuclear organization 13–18
- Respiratory muscles
 electromyography, chronic obstructive pulmonary disease 625–632
- runt* locus
 translocation breakpoints, acute myeloid leukaemia 215–218
- Salbutamol
 sodium–potassium ATPase, cystic fibrosis 277–284
- Salt restriction
 dehydration, arginine vasopressin 305–310
- Satiety
 cholecystokinin, radioimmunoassay 375–381
- Secretor status
 gastric mucins, peptic ulcer 405–415
- Selenium
 thyroid hormones, aging 637–642
- Sepsis
 multiple organ failure, glucose utilization 601–609
 protein synthesis, glutamine 311–319
- Serine variants
 G-protein, atrium 487–495
- Shy-Drager syndrome
 hypotension, octreotide 367–373
- Sialyltransferases
 expression, colonic neoplasms 397–404
- Signal transduction
 vasodilatation, cirrhosis 227–232
- Single nucleotide primer extension
 G-protein, serine variants 487–495
- Single-photon computerized emission tomography
 isogravitational perfusion heterogeneity, lung transplantation 285–291
- Skeletal muscle metabolism
 peripheral vascular disease, magnetic resonance spectroscopy 581–590
- Skin
 fibroblasts, collagen 69–73
- Small intestine
 cell proliferation, epidermal growth factor 117–120
 protein synthesis, sepsis 311–319
- Smoking
 coronary heart disease, lipoprotein metabolism 333–342*
 nitric oxide, vitamin E 343–348
- Smooth muscle
 myosin heavy-chain isoform, aminonucleoside nephrosis 45–52

- Sodium
 cytosolic magnesium, platelets 293–298
- Sodium clearance
 proximal tubule, arginine vasopressin
 antidiuresis 27–36
- Sodium restriction
 kidney, arginine vasopressin 37–43
- Sodium–potassium ATPase
 inhibitors, cystic fibrosis 277–284
- Somatostatin
 hypotension, autonomic failure 367–373
- Split proinsulin
 hypopituitary, growth hormone 321–328
- Stable strontium
 intestinal calcium absorption 107
- Stimulatory G-protein
 serine variants, atrium 487–495
- Stroke
 aortic distensibility, blood pressure 247–253
- Surgery
 wound healing, malnutrition 383–388
- Sympathetic nervous system
 food intake, energy 145–154
 nitric oxide, blood pressure 177–182
 thermogenesis, meal frequency 349–357
- Thermogenesis
 sympathetic nervous system, meal
 frequency 349–357
- Thermoregulation
 gender, α -adrenoceptors 219–225
- Thrombogenesis
 fibrin, D-dimer 205–214*
- Thrombomodulin
 exertional heat stroke 261–265
- Thyroid hormones
 selenium, aging 637–642
- Thyroid-stimulating hormone
 selenium, aging 637–642
- Tissue inhibitor of metalloproteinase-1
 lipocytes, hepatitis 75–81
- Tissue injury
 blood flow, diabetes 467–474
- Tolerance
 caffeine, orthostasis 475–480
- Total body water
 bio-impedance, surgical patients 651–658
- Transcription
 nuclear organization 13–18
- Translocation breakpoints
MTG8 locus, acute myeloid leukaemia 215–218
- Trauma
 wound healing, malnutrition 383–388
- Triacylglycerol
 coronary heart disease, smoking 333–342*
 high-density lipoprotein, paediatric
 tumours 505–510
- Tryptophan metabolism
 cataract 591–599
- Tumours
 high-density lipoprotein, triacylglycerol 505–510
- Ulcerative colitis
 interleukin-1 β , intracolonic release 521–526
- Upper airway
 negative pressure, electromyogram 441–445
- Urogastrone
 anaemia, Goettingen minipigs 453–458
 cell proliferation, small intestine 117–120
- Urolithiasis
 urinary F1 activation peptide, crystal
 aggregation 533–541
- Vaccination
 protein metabolism 389–396
- Vagi nerves
 neonatal respiration, oxygen uptake 101–105
- Vascular dysfunction
 diabetes, endothelium 459
- Vasculature
 blood pressure, nitric oxide 177–182
 endothelin receptor, non-peptide
 antagonist 575–579
 nitric oxide, arginine 183–190
- Vasoactive intestinal polypeptide
 exercise, maltodextrin 137–143
- Vasoactive intestinal peptide
 metabolism, endopeptidase 267–271
- Vasodilatation
 calcitonin gene-related peptide,
 immunoblockade 565–573
- Vasodilatory peptides
 hypotension, autonomic failure 367–373
- Vasopressin receptor
 non-peptide antagonist, human arteries 481–485
- Vasopressin-induced contraction
 inhibition, human arteries 481–485
- Ventilatory control
 vagi nerves, oxygen uptake 101–105
- Ventricle
 insulin-like growth factor I, cardiac
 transplantation 53–57
- Vitamin E
 nitric oxide, smoking 343–348
- Volume regulation
 angiotensin II, conscious dogs 19–25
- von Willebrand factor antigen
 exertional heat stroke 261–265

Subject Index

xxi

Water restriction
salt restriction, arginine vasopressin 305–310

Weaning
muscle necrosis, diet 447–452

Weight reduction
lipolysis, adipocytes 421–429

Wound healing
protein synthesis, malnutrition 383–388

Xanthurenic acid
metabolism, cataract 591–599
