AUTHOR INDEX

- Abdel-Rahman, T.A. 485-492
Abe, K. 31-36, 55-60
Aihara, A. 55-60
Al-Ani, M. 235-241
Aller, M.-A. 321-322
Ameshima, S. 517-523
Ang, B.C. 73-75
Arias, J. 321-322
Arner, P. 243-253, 453-456
Ashby, M.J. 37-46
- Barnes, P.J. 301-306
Bartlett, K. 307-313
Bavington, C. 61-71
Bech, J.N. 87-89
Belcher, P.R. 363-368
Bennett, J.L. 183-187
Bennett, M.A. 21-29
Bergelson, B.A. 261-268
Bernardi, L. 345-355
Berre, J. 105-111
Bettany, G.E.A. 73-75
Bhaskar, A. 255-260
Bing, C. 499-505
Blum, M. 379-384
Boulton, A.J.M. 183-187
Broughton Pipkin, F. 499-505
Burnett, J.C. 357-362
Buxton, B.F. 91-96
- Cabili, S. 379-384
Cacabelos, R. 153-156
Calciati, A. 345-355
Capdevila, A. 81-85
Carr, P. 507-510
Chan, S.-H. 127-133
Chang, C.-J. 127-133
Chen, J.R. 91-96
Cheng, C. 97-103
Chow, N.-H. 127-133
Christensen, N.J. 269-276
Clark, A.F. 435-446
Clark, M.L. 409-415
Coats, A.J.S. 345-355
Collins, K.J. 485-492
Coote, J.H. 235-241
- Coppack, S.W. 409-415
Corry, D.B. 2-8
Court-Payen, M. 269-276
Cowley, A.J. 473-483
Csernihovsky, T. 379-384

SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Reviews.

- Acetylcholine
Goldblatt hypertension, angiotensin-converting enzyme inhibitors 21–29
- Acid-base control
muscle, exercise 323–335*
- Acute tobacco smoking
probucol 517–523
- Acute renal failure
lactate metabolism, haemofiltration 507–510
- Adipose tissue
carbohydrate metabolism, insulin resistance 409–415
interstitial glycerol 453–456
- Adrenaline
baroreflex activity, lower body negative pressure 337–343
- Adrenergic agents
oxygen consumption/delivery relationship 105–111
- Adriamycin
angiotensin-converting enzyme inhibition, proteinuria 393–401
- Ageing
facial cooling, cardiorespiratory reflexes 485–492
- Alcohol
fatty liver, β -oxidation 307–313
- Altitude
brain damage, Sherpas 81–85
- Amino acid turnover
muscle, starvation 457–466
- Ammonia
protein turnover, bed rest 73–75
- Angiogenesis
basic fibroblast growth factor, urothelial carcinoma 127–133
- Angiotensin I-receptor blockade
renal effects 205–213
- Angiotensin receptors
myometrium, pregnancy 499–505
- Angiotensin-converting enzyme inhibitors
resistance artery, endothelium-dependent relaxation 21–29
- Angiotensin-converting enzyme inhibition
nephrosis, proteinuria 393–401
renal effects 205–213
- Antioxidant enzymes
lipid peroxidation, diabetes 255–260
- Antioxidant vitamins
lipid peroxidation, diabetes 255–260
- L-Arginine
nitric oxide, diabetes mellitus 379–384
- Arrhythmias
gap junctions, myocardium 447–452
- Arteries
endothelin B receptor agonists and antagonists 91–96
- Articular cartilage
membrane potential, ion channels 61–71
- Asthma
perception, treatment 227–234
- Atrial natriuretic peptide
gene expression, renovascular hypertension 197–204
heart failure, diuretics 31–36
mean blood pressure, epoprostenol 87–89
- Autonomic insufficiency
orthostatic intolerance, venous pooling 277–285
- Autonomic tone
skin microcirculation 345–355
- Baroreflex activity
catecholamines, lower body negative pressure 337–343
skin microcirculation 345–355
- Baroreflex sensitivity
renal nerves, hypertension 287–293
- Basic fibroblast growth factor
inflammation, urothelial carcinoma 127–133

- Beclomethasone**
 asthma, perception 227–234
- Bed rest**
 protein turnover, urea 73–75
- Big endothelin**
 immunochemistry, human endocardial
 endothelial cells 37–46
- Bile acid malabsorption**
 lathosterol, ⁷⁵SeHCAT test 315–319
- Blood**
 carbon dioxide, exercise 323–335*
- Blood flow**
 autonomic tone, skin 345–355
 meal composition 269–276
- Blood pressure**
 lisinopril, angiotensin-converting enzyme
 inhibition 393–401
 seasonal variation 55–60
- Blood pressure regulation**
 gene targeting 435–446*
- Bradykinin**
 Goldblatt hypertension, angiotensin-converting
 enzyme inhibitors 21–29
- Brain damage**
 Sherpas, magnetic resonance 81–85
- Brain natriuretic peptide**
 gene expression, renovascular
 hypertension 197–204
- Breath-holding**
 facial cooling, ageing 485–492
- Bronchoconstriction**
 perception, treatment 227–234
- Buffering capacity**
 platelets, diabetes 13–19
- Burns**
 wound healing, proteoglycans 417–425
- Calcium**
 vascular smooth muscle, ouabain 9–12
- L-Canavanine**
 nitric oxide synthase, endotoxaemia 369–377
- Canine kidney**
 glomerular haemodynamics,
 endothelin-1 385–391
- Capillary filtration coefficient**
 diabetes, microangiopathy 113–117
- Carbohydrate**
 postprandial haemodynamics 269–276
- Carbohydrate meal**
 haemodynamics, cardiac transplant 473–483
- Carbohydrate metabolism**
 insulin resistance 409–415
- Carbon dioxide**
 metabolism, exercise 323–335*
- Cardiac output**
 meal composition 269–276
- Cardiac transplant**
 postprandial haemodynamics 473–483
- Cardiac vagus**
 facial cooling, ageing 485–492
- Cardiology**
 Spain 156–158
- Cardiomyocytes**
 phospholipase A₂, hypertension 403–407
- Cardiopulmonary baroreceptors**
 catecholamines, lower body negative
 pressure 337–343
- Cardiorespiratory reflexes**
 facial cooling, ageing 485–492
- Cartilage**
 membrane potential, ion channels 61–71
- Catecholamines**
 baroreflex activity, lower body negative
 pressure 337–343
- Cell attachment**
 endothelial cells, organ preservation 135–141
- Cerebral hypoxia**
 Sherpas, magnetic resonance 81–85
- Chlorothiazide**
 renin, heart failure 31–36
- Cholesterol**
 coronary vascular reserve, endothelium 261–268
- Cholesterol synthesis**
 bile acid synthesis, lathosterol 315–319
- Chondrocytes**
 mechanoreceptors, ion channels 61–71
- Chronic fatigue syndrome**
 enterovirus, polymerase chain reaction 295–300
- Chronic renal failure**
 sodium, potassium pump 3–8
- Climbing**
 brain damage, Sherpas 81–85
- Clinical research**
 progress in Spain 147–171
- Coagulation**
 thrombin, recombinant hirudin 363–368
- Compliance**
 definitions 143–146, 433–434
- Connexin43**
 arrhythmias, gap junctions 447–452
- Coronary blood flow**
 natriuretic peptides 357–362
- Coronary heart disease**
 fatty acids 243–253*
- Coronary thrombosis**
 thrombin, recombinant hirudin 363–368
- Coronary vascular reserve**
 endothelium, hypercholesterolaemia 261–268

- Creatine kinase
 muscle damage, chronic fatigue syndrome 295–300
- Cromoglycate
 asthma, perception 227–234
- Cyclo-oxygenase
 gene expression, endotoxaemia 301–306
- Cytokines
 fulminant hepatic failure 77–80
- Daytime length
 blood pressure 55–60
- Definitions
 compliance 433–434
- Dermatan sulphate
 burns, wound healing 417–425
- Diabetes
 antioxidant status, lipid peroxidation 255–260
 fatty acids, coronary heart disease 243–253*
 microalbuminuria, sodium/hydrogen exchange rate 13–19
 microangiopathy, vascular permeability 113–117
 nitric oxide, L-arginine 379–384
 peripheral neuropathy, rheology 183–187
 plasma renin activity, hyperglycaemia 189–195
- Diuretics
 renin, heart failure 31–36
- Dobutamine
 oxygen consumption/delivery relationship 105–111
- Dopamine
 renal tubular function, lithium clearance 511–515
- Doxorubicin
 angiotensin-converting enzyme inhibition, proteinuria 393–401
- Eating
 haemodynamic effects 269–276
- Eccentric exercise
 strength loss, muscle damage 119–125
- Elastase inhibitory capacity
 acute tobacco smoking, probucol 517–523
- Embryonic stem cells
 gene targeting 435–446*
- Endocardial endothelial cells
 endothelin, reverse transcriptase–polymerase chain reaction 37–46
- Endocrinology
 Spain 169–171
- Endogenous lithium clearance
 dopamine, renal tubular function 511–515
- Endogenous natriuretic peptides
 coronary blood flow 357–362
- Endothelial cells
 permeability, organ preservation 135–141
- Endothelin
 reverse transcriptase–polymerase chain reaction, human endocardial endothelial cells 37–46
- Endothelin B receptor agonists
 arteries 91–96
- Endothelin B receptor antagonists
 arteries 91–96
- Endothelin receptor subtypes
 arteries 91–96
- Endothelin-1
 glomerular haemodynamics 385–391
- Endothelium
 coronary vascular reserve, hypercholesterolaemia 261–268
- Endothelium-dependent relaxation
 Goldblatt hypertension, angiotensin-converting enzyme inhibitors 21–29
- Endotoxaemia
 cyclo-oxygenase, gene expression 301–306
 nitric oxide synthase, L-canavanine 369–377
- Enterovirus
 chronic fatigue syndrome, polymerase chain reaction 295–300
- Epidermal growth factor
 mucosal mass, starvation 427–431
- Epoprostenol
 atrial natriuretic peptide, mean blood pressure 87–89
- Exercise
 carbon dioxide, metabolism 323–335*
 protein turnover, bed rest 73–75
- Exogenous lithium clearance
 dopamine, renal tubular function 511–515
- Facial cooling
 cardiorespiratory reflexes, ageing 485–492
- Faecal bile acid excretion
 lathosterol, ⁷⁵SeHCAT test 315–319
- Fasting
 muscle necrosis, *mdx* mouse 467–472
- Fat
 postprandial haemodynamics 269–276
- Fat meal
 haemodynamics, cardiac transplant 473–483
- Fatty acids
 coronary heart disease 243–253*
- Ferroxidase activity
 acute tobacco smoking, probucol 517–523
- Forearm
 carbohydrate metabolism, insulin resistance 409–415
- Forearm blood flow
 hyperglycaemia, diabetes 189–195

- Fractional dextran clearance
renin-angiotensin system inhibition 205-213
- Fulminant hepatic failure
tumour necrosis factor soluble receptor 77-80
- Gap junctions
arrhythmias, myocardium 447-452
- Gene expression
cyclo-oxygenase, endotoxaemia 301-306
natriuretic peptides, renovascular hypertension 197-204
- Gene targeting
blood pressure regulation 435-446*
- Genetic hypertension
phospholipase A₂, cardiomyocytes 403-407
- Glomerular filtration rate
hyperglycaemia, diabetes 189-195
renin-angiotensin system inhibition 205-213
- Glomerular haemodynamics
endothelin-1 385-391
- Glomerular ultrafiltration
endothelin-1 385-391
- Glomerulosclerosis
angiotensin-converting enzyme inhibition 393-401
- Glucose uptake
insulin resistance 409-415
- Glutathione
acute tobacco smoking, probucol 517-523
- Glycerol
muscle, adipose tissue 453-456
- Glycine
protein turnover, bed rest 73-75
- Guanylyl cyclase
endogenous natriuretic peptides 357-362
- Haematology
Spain 167-169
- Haemodynamic effects
meal composition 269-276
- Haemofiltration
lactate metabolism, acute renal failure 507-510
- Heart failure
renin, diuretics 31-36
vascular endothelium, psycho-neuro-immune-endocrine system 321-322
- Heart rate
atrial natriuretic peptide, epoprostenol 87-89
- Heart rate variability
respiratory sinus arrhythmia 227-234
skin microcirculation, autonomic tone 345-355
spectral analysis, thermoregulation 97-103
- Hepatology
Spain 162-167
- Hirudin
thrombin, intracoronary thrombosis 363-368
- Homologous recombination
gene targeting 435-446*
- Host-tumour interaction
basic fibroblast growth factor, urothelial carcinoma 127-133
- Hypercholesterolaemia
coronary vascular reserve, endothelium 261-268
- Hyperglycaemia
plasma renin activity, diabetes 189-195
- Hypertension
baroreflex sensitivity, renal nerves 287-293
phospholipase A₂, cardiomyocytes 403-407
resistance artery, angiotensin-converting enzyme inhibitors 21-29
sodium/hydrogen exchange rate, diabetes 13-19
Spain 159-160
- Hypertension research
gene targeting 435-446*
- Hypertrophic scars
wound healing, proteoglycans 417-425
- Hypertrophy
arrhythmias, gap junctions 447-452
- Hypothermia
heart rate variability, spectral analysis 97-103
- Hypoxia
Sherpas, magnetic resonance 81-85
- Hypoxic pulmonary vasoconstriction
lung oedema, reactive oxygen species scavengers 47-54
- Ileal resection
bile acid malabsorption 315-319
- Immunological research
Spain 148-153
- Indoor temperature
blood pressure 55-60
- Inducible nitric oxide synthase
endotoxaemia, L-canavanine 369-377
- Inflammation
basic fibroblast growth factor, urothelial carcinoma 127-133
- Infra-red photoplethysmography
skin microcirculation, autonomic tone 345-355
- Insulin resistance
carbohydrate metabolism 409-415
fatty acids, coronary heart disease 243-253*
- Interstitial glycerol
muscle, adipose tissue 453-456
- Ischaemia
arrhythmias, gap junctions 447-452
- Ischaemia-reperfusion injury
hypoxic pulmonary vasoconstriction, reactive oxygen species scavengers 47-54

- Kidney function
dopamine, lithium clearance 511–515
- Lactate metabolism
haemofiltration, acute renal failure 507–510
insulin resistance 409–415
- Lactic acidosis
haemofiltration, acute renal failure 507–510
- Lathosterol
⁷⁵SeHCAAT test, bile acid
malabsorption 315–319
- Lipid peroxide
acute tobacco smoking, probucol 517–523
- Lipid peroxidation
antioxidant status, diabetes 255–260
- Lipolysis
adipose tissue 453–456
- Lipopolysaccharide
cyclo-oxygenase, gene expression 301–306
- Lisinopril
angiotensin-converting enzyme inhibition,
nephrosis 393–401
- Lithium clearance
dopamine, renal tubular function 511–515
renin–angiotensin system inhibition 205–213
- Liver
alcohol, β -oxidation 307–313
- Liver failure
tumour necrosis factor soluble receptor 77–80
- Lower body negative pressure
baroreflex activity, catecholamines 337–343
facial cooling, ageing 485–492
- Luminal epidermal growth factor
mucosal mass, starvation 427–431
- Lung oedema
hypoxic pulmonary vasoconstriction, reactive
oxygen species scavengers 47–54
- Mature scars
wound healing, proteoglycans 417–425
- Mdx* mouse
muscle necrosis, fasting 467–472
- Meal composition
haemodynamic effects 269–276
- Mean blood pressure
atrial natriuretic peptide, epoprostenol 87–89
- Membrane transport
amino acids, starvation 457–466
- Menstrual cycle
angiotensin receptors, myometrium 499–505
- Metabolism
carbon dioxide, exercise 323–335*
- Microalbuminuria
diabetes, vascular permeability 113–117
sodium/hydrogen exchange rate, diabetes 13–19
- Microangiopathy
diabetes, vascular permeability 113–117
- Microcirculation
sepsis 173–182*
- Microvascular disease
rheology, peripheral neuropathy 183–187
- Mitochondria
muscle, chronic fatigue syndrome 295–300
- Monolayer continuity
endothelial cells, organ preservation 135–141
- N^G*-monomethyl-L-arginine
pregnancy 493–497
- Mouse embryonic stem cells
gene targeting 435–446*
- Mucosal mass
epidermal growth factor, starvation 427–431
- Muscle pain
virus infection, chronic fatigue
syndrome 295–300
- Muscle
carbohydrate metabolism, insulin
resistance 409–415
carbon dioxide, exercise 323–335*
interstitial glycerol 453–456
protein turnover, starvation 457–466
- Muscle damage
strength loss, eccentric exercise 119–125
- Muscle necrosis
fasting, *mdx* mouse 467–472
- Muscular dystrophy
fasting, *mdx* mouse 467–472
- Myocardium
arrhythmias, gap junctions 447–452
- Myometrium
angiotensin receptors, pregnancy 499–505
- Natriuretic peptides
gene expression, renovascular
hypertension 197–204
- Natriuretic peptide receptor antagonist
coronary blood flow 357–362
- Necrosis
fasting, *mdx* mouse 467–472
- Nephrology
Spain 161–162
- Nephrosis
angiotensin-converting enzyme inhibition,
proteinuria 393–401
- Neuroscience
Spain 153–156
- Nitrate
diabetes mellitus 379–384
- Nitric oxide
L-arginine, diabetes mellitus 379–384
pregnancy 493–497

- Nitric oxide synthase
 endotoxaemia, L-canavanine 369–377
 gene expression, endotoxaemia 301–306
 Nitric oxide synthase inhibitor
 diabetes mellitus 379–384
 Nitrite
 diabetes mellitus 379–384
 Nitroprusside
 oxygen consumption/delivery
 relationship 105–111
 Non-essential nitrogen
 protein requirements 215–225
 Non-esterified fatty acids
 coronary heart disease 243–253*
 Noradrenaline
 baroreflex activity, lower body negative
 pressure 337–343
 Obesity
 fatty acids, coronary heart disease 243–253*
 Organ preservation
 endothelial cells, permeability 135–141
 Orthostatic hypotension
 autonomic insufficiency, venous
 pooling 277–285
 Orthostatic tachycardia
 autonomic insufficiency, venous
 pooling 277–285
 β -Oxidation
 fatty liver, alcohol 307–313
 Ouabain
 calcium, vascular smooth muscle 9–12
 Outdoor temperature
 blood pressure 55–60
 Oxygen uptake
 dobutamine, nitroprusside 105–111
 Peak expiratory flow
 asthma, perception 227–234
 Perception
 asthma, treatment 227–234
 Peripheral neuropathy
 rheological and microvascular
 parameters 183–187
 Permeability
 endothelial cells, organ preservation 135–141
 Phenylalanine turnover
 muscle, starvation 457–466
 Phospholipase A₂,
 cardiomyocytes, hypertension 403–407
 Physicochemical factors
 carbon dioxide, exercise 323–335*
 Plasma renin activity
 hyperglycaemia, diabetes 189–195
 renal nerves, hypertension 287–293
 Platelets
 recombinant hirudin, intracoronary
 thrombosis 363–368
 sodium/hydrogen exchange rate, diabetes 13–19
 Policy on clinical research
 Spain 147–148
 Polymerase chain reaction
 enterovirus, chronic fatigue syndrome 295–300
 Postprandial haemodynamics
 cardiac transplant 473–483
 meal composition 269–276
 Postprandial metabolism
 insulin resistance 409–415
 Posture
 sympathetic activity 345–355
 Power spectrum
 skin microcirculation, autonomic tone 345–355
 Pregnancy
 angiotensin receptors, myometrium 499–505
 nitric oxide 493–497
 Probucol
 acute tobacco smoking 517–523
 Prostacyclin
 atrial natriuretic peptide, mean blood
 pressure 87–89
 Prostaglandin G/H synthase
 gene expression, endotoxaemia 301–306
 Protein
 postprandial haemodynamics 269–276
 Protein requirements
 urea kinetics 215–225
 Protein turnover
 muscle, starvation 457–466
 post-absorptive state, bed rest 73–75
 Proteinuria
 angiotensin-converting enzyme inhibition,
 nephrosis 393–401
 Proteoglycans
 burns, wound healing 417–425
 Psycho-neuro-immune-endocrine system
 vascular endothelium, heart failure 321–322
 Reactive oxygen species scavengers
 lung oedema, hypoxic pulmonary
 vasoconstriction 47–54
 Renal haemodynamics
 endothelin-1 385–391
 Renal nerves
 baroreflex sensitivity, hypertension 287–293
 Renal tubular function
 dopamine, lithium clearance 511–515
 Renovascular hypertension
 natriuretic peptides, gene expression 197–204

- Resistance artery
 - Goldblatt hypertension, angiotensin-converting enzyme inhibitors 21–29
- Respiratory sinus arrhythmia
 - heart rate variability 227–234
- Rheology
 - microvascular disease, peripheral neuropathy 183–187
- Salt intake
 - renal nerves, hypertension 287–293
- Scopolamine
 - respiratory sinus arrhythmia 227–234
- Seasonal variation
 - blood pressure 55–60
- ⁷⁵SeHCAT test
 - lathosterol, bile acid malabsorption 315–319
- Sepsis
 - cyclo-oxygenase, endotoxaemia 301–306
 - microcirculation 173–182*
- Sherpas
 - cerebral hypoxia, magnetic resonance 81–85
- Skin microcirculation
 - autonomic tone 345–355
- Small intestine
 - epidermal growth factor, starvation 427–431
- Sodium excretion
 - renal nerves, hypertension 287–293
- Sodium/hydrogen exchange rate
 - diabetes, microalbuminuria 13–19
- Sodium–potassium–chloride co-transport
 - uraemia 3–8
- Sodium, potassium pump
 - uraemia 3–8
- Spain
 - progress in clinical research 147–171
- Spectral analysis
 - heart rate variability, thermoregulation 97–103
- Starvation
 - amino acid turnover, protein turnover 457–466
 - mucosal mass, epidermal growth factor 427–431
- Steatosis
 - alcohol, β -oxidation 307–313
- Strength loss
 - muscle damage, eccentric exercise 119–125
- Streptozotocin
 - diabetes mellitus, nitric oxide 379–384
- Stress
 - fatty acids, coronary heart disease 243–253*
- Superoxide dismutase
 - lung oedema, hypoxic pulmonary vasoconstriction 47–54
- Sympathetic nerves
 - sodium retention, hypertension 287–293
- Temperature
 - blood pressure 55–60
- Theophylline
 - asthma, perception 227–234
- Thermoregulation
 - heart rate variability, spectral analysis 97–103
- Thrombin
 - recombinant hirudin, intracoronary thrombosis 363–368
- Thrombosis
 - thrombin, recombinant hirudin 363–368
- Tissue nutrition
 - sepsis 173–182*
- Tobacco smoke inhalation
 - probucol 517–523
- Tocopherol
 - acute tobacco smoking, probucol 517–523
- Total exchangeable body sodium
 - heart failure, diuretics 31–36
- Tracer
 - protein turnover, muscle 457–466
- Transitional cell carcinoma
 - angiogenesis, basic fibroblast growth factor 127–133
- Tumour necrosis factor- α
 - fulminant hepatic failure 77–80
- Tumour necrosis factor soluble receptor
 - fulminant hepatic failure 77–80
- Uraemia
 - sodium, potassium pump 3–8
- Urea
 - protein turnover, bed rest 73–75
- Urea kinetics
 - protein requirements 215–225
- Urological disease
 - angiogenesis, basic fibroblast growth factor 127–133
- Urothelial carcinoma
 - inflammation, basic fibroblast growth factor 127–133
- Uterine angiotensin receptors
 - pregnancy 499–505
- Vascular endothelium
 - heart failure, psycho–neuro–immune–endocrine system 321–322
- Vascular mechanics
 - definitions 143–146
- Vascular medicine
 - Spain 159–160
- Vascular permeability
 - diabetes, microangiopathy 113–117
- Vascular smooth muscle
 - calcium, ouabain 9–12

- Vascular structure
 - Goldblatt hypertension, angiotensin-converting enzyme inhibitors 21–29
- Vasodilating agents
 - oxygen consumption/delivery relationship 105–111
- Veins
 - nitric oxide, pregnancy 493–497
- Venous *N*^G-monomethyl-L-arginine pregnancy 493–497
- Venous pooling
 - orthostatic intolerance, autonomic insufficiency 277–285
- Virus infection
 - chronic fatigue syndrome, polymerase chain reaction 295–300
- Wound healing
 - burns, proteoglycans 417–425
