1. POLICY OF THE JOURNAL

1.1. Scope

Clinical Science publishes papers in the field of clinical investigation, provided they are of a suitable standard and contribute to the advancement of knowledge in this field. The term 'clinical investigation' is used in its broadest sense to include studies in animals and the whole range of biochemical, physiological, immunological and other approaches that may have relevance to disease in man. Studies which are confined to normal subjects, or animals, or are purely methodological in nature may be acceptable. The material presented should permit conclusions to be drawn and should not be only of a preliminary nature. The journal publishes five types of manuscript, namely invited Editorial Reviews, Full Papers, Rapid Communications, Correspondence and invited Comments. In addition, Clinical Science publishes abstracts of the proceedings of the Medical Research Society (as Supplements) and also the Bayer Lecture.

1.2. Availability on the World Wide Web (WWW)

Abstracts of all articles are available on the journal's home page on the WWW (http://cs.portlandpress.co.uk). The journal will become fully online during 1998.

1.3. The editorial process

Membership of the Editorial Board covers as wide a range of interests as possible.

A submitted paper is considered by an appropriate editor together with (usually) two Referees from outside the membership of the Board. The Editor returns it with a recommendation to the Editor in Chief or Regional Editor, who then writes formally to the authors. The ultimate responsibility of acceptance for publication lies with the Editor in Chief.

Authors may suggest potential referees for their papers in the submission letter. The journal is under no obligation to follow such suggestions, but, if it does so, only one of the referees will be chosen from the authors' nominations, as the other referee will be selected independently.

1.4. Ethics of investigations

(a) Human subjects. Authors must state in the text of their paper that the research has been carried out in accordance with the Declaration of Helsinki (1989) of the World Medical Association, and has been approved by the Ethics Committee of the institution in which the work was performed. Consent must be obtained from each patient or subject after full explanation of the purpose, nature and risk of all procedures used, and the fact that such

Acetylcholine
  coronary arteries, hypertension  231–238
  endothelial dysfunction, hypercholesterolaemia 129–134
  neurovascular stimulation, diabetic neuropathy 255–261
N-Acetyl-β-D-glucosaminidase
  proteinuria, lisinopril  425–430
Acquired immunodeficiency syndrome
  leptin, anorexia  479–483
Acute phase proteins
  infection, protein metabolism  413–423
Adenosine deaminase deficiency
  polymorphism, haemorrhagic telangiectasia 207–218*
S-Adenosylhomocysteine
  brain, protein carboxymethylation 677–685
S-Adenosylmethionine
  brain, protein carboxymethylation 677–685
Adhesion
  platelet P-selectin, neutrophil cathepsin G 437–445
Adhesion molecule-1
  inflammatory response, circadian rhythm 537–540
Adipose tissue
  lipolysis, glucose metabolism  71–77
Adolescents
  diabetes, cardiovascular reflexes 615–621
  haematopoiesis, leptin 633–636
Adrenaline
  isometric exercise, muscle sympathetic activity 383–393
  thermogenesis, energy expenditure  121–127
Adrenomedullin
  cardiac surgery, anaesthesia  585–590
  gene expression, cardiac hypertrophy 359–365
  hypertrophic cardiomyopathy, natriuretic peptides 21–28
  myocardial infarction, natriuretic peptides 135–139
Aerobic exercise
  heart rate variability, aging  579–584
Aging
  aerobic exercise, heart rate variability 579–584
  osteogenesis, colony forming units-fibroblastic 549–555
Airway obstruction
  cold exposure, asthma  525–529
Airway occlusion
  pulmonary blood flow distribution, blood gases 453–460
Albumin
  bile-salt-dependent lipase, glycation  181–188
Alkaline phosphatase
  colonic epithelium, butyrate enema 671–676
  hypophosphatasia, pyridoxal-5′-phosphate 203–206
Ammonia excretion
  proteinuria, lisinopril  425–430
Anabolic block
  tuberculosis, undernutrition 321–331
Anaesthesia
  adrenomedullin, cardiac surgery  585–590
Angiotensin-converting enzyme
  glomerular permeability, diabetes  165–173
Angiotensin-converting enzyme inhibitors
  diabetic nephropathy, hypertension 511–516
  maternal undernutrition, hypertension 337–338, 373–381
  proximal tubular hypercatabolism, lisinopril 425–430
Anorexia
  acquired immunodeficiency syndrome, leptin 479–483
Antioxidant enzyme activity
  oxidative stress, elderly  447–452
Antioxidant enzymes
  diabetes, liver  623–632
Antioxidant status
  preterm infants, lipid peroxidation 197–201
Antioxidants
  diabetes, dietary supplements 189–195
  hypercholesterolaemia, coronary artery disease 129–134
  low-density lipoprotein, β-blockers 573–578
Aprotinin
- cardiopulmonary bypass, nitric oxide 505–509
- renal tubular injury, lisinopril 425–430

L-Arginine
- endothelial dysfunction, hypercholesterolaemia 129–134

L-Arginine transport
erythrocytes, heart failure 3–4, 43–48

Asthma
cold exposure, airway reactivity 525–529
- glucocorticoids, gene transcription 557–572*

Atherosclerosis
diabetes, glycation 181–188
- vascular matrix remodelling, matrix metalloproteinases 103–110*

Athymic mice
colon cancer, fish oil 303–311

ATP synthase
mitochondrion, heart muscle 499–504

Atrial natriuretic peptide
- adrenomedullin, myocardial infarction 135–139
- cardiac hypertrophy, gene expression 359–365
- glomerular permeability, diabetes 165–173
- heart failure 591–599
- hypertrophic cardiomyopathy, adrenomedullin 21–28

Atrial pacing
- myocardial ischaemia, thromboxane 29–34

Autoantibodies
diabetes, genetic susceptibility 263–269

Autonomic failure
- blood pressure, exercise 5, 49–55
- orthostatic hypotension 347–352

Autonomic neuropathy
diabetes, baroreflex sensitivity 615–621

β-blockers
- low-density lipoprotein, oxidation 573–578

Baroreflex sensitivity
diabetes, autonomic neuropathy 615–621
- hypertension, elderly 245–253

Bile-salt-dependent lipase
- albumin, glycation 181–188

Blood clotting
- platelets, vascular endothelial growth factor 395–404

Blood flow
- nitric oxide, insulin sensitivity 175–180

Blood gases
- bronchial occlusion, pulmonary flow distribution 453–460

Blood pressure
- baroreflex sensitivity, pressoreceptors 245–253
- captopril, maternal undernutrition 337–338, 373–381
- chronic fatigue syndrome, heart rate variability 57–63
- endothelium-dependent vasodilatation, noradrenaline 601–607
- gastric emptying, diabetes mellitus 65–70
- glucocorticoids, prenatal exposure 149–155
- insulin resistance, hypertension 609–614
- sympathetic denervation, exercise 5, 49–55

Blood specimens
- factitious hyperkalaemia 101

Body cooling
- flow-mediated dilatation, Raynaud’s disease 239–243

Body fat
- acquired immunodeficiency syndrome, leptin 479–483

Body mass index
- insulin, leptin 633–636

Bone
- osteoprogenesis, aging 549–555
- bone mineral density
  - lactation, pregnancy 405–412
- Brachial artery
  - endothelium-dependent dilatation, Raynaud’s disease 239–243

Brain blood flow
- hyperventilation, isometric exercise 353–358

Brain
- hypoglycaemia, lactate 157–163
- protein carboxymethylation 677–685

Brain natriuretic peptide
- adrenomedullin, myocardial infarction 135–139
- heart failure 591–599
- hypertrophic cardiomyopathy, adrenomedullin 21–28

Bronchial occlusion
- pulmonary flow distribution, blood gases 453–460

Bronchoalveolar lavage fluid
- interstitial lung disease, cytokeratins 531–535

Bumetanide
- natriuretic response, metabolic alkalosis 287–292, 687

Burns
- hypertrophic scar tissue, proteoglycans 541–547

Butyrate enema
- colonic epithelium, cell proliferation 671–676

Calcium
- hypertension, membrane microviscosity 79–85
Calcium intake
  bone mineral density, pregnancy 405–412
Calcium ions
  ATP synthase, heart muscle 499–504
Captopril
  maternal undernutrition, hypertension 337–338, 373–381
Carbohydrate ingestion
  lipolysis, adipose tissue 71–77
Carbon tetrachloride
  hepatic injury, epidermal growth factor 219–223
Carboxymethylation
  protein, brain 677–685
Cardiac baroreflex sensitivity
  aerobic exercise, aging 579–584
Cardiac hypertrophy
  adrenomedullin, gene expression 359–365
Cardiac output
  obesity, adrenaline 121–127
  orthostatic hypotension, autonomic failure 347–352
Cardiac surgery
  adrenomedullin, anaesthesia 585–590
  oxygen, plasma lipid 1, 35–41
Cardiopulmonary bypass
  adrenomedullin, anaesthesia 585–590
  lipid-associated oxygen, blood 1, 35–41
  nitric oxide, aprotinin 505–509
Cardiovascular reflexes
  diabetes, adolescents 615–621
Cardiovascular response
  obesity, thermogenesis 121–127
Carotenoids
  diabetes, dietary supplements 189–195
Catalase
  diabetes, oxidative stress 623–632
  oxidative stress, elderly 447–452
Catecholamines
  heart failure 591–599
Cathepsin
  oxidative stress, elderly 447–452
Cathepsin G
  platelet–neutrophil adhesion, platelet P-selectin 437–445
Cell proliferation
  colonic epithelium, butyrate enema 671–676
Cerebral blood flow
  isometric exercise, hyperventilation 353–358
Cerebral dysfunction
  diabetes, lactate 157–163
Chronic atrophic gastritis
  mucins 87–99
Chronic fatigue syndrome
  heart rate variability, blood pressure 57–63
Chronic ischaemic myocardial remodelling
  N\textsuperscript{\textit{n}}-nitro-L-arginine, coronary arteries 141–147
Chronic lung disease
  total antioxidant status, preterm infants 197–201
Circadian rhythm
  adhesion molecule-1, inflammatory response 537–540
Circulatory reflex adjustment
  orthostatic hypotension, autonomic failure 347–352
Cirrhosis
  nitric oxide, peripheral vascular resistance 637–643
  portal hypertension, octreotide 367–371
Clinical characteristics
  diabetes, genetic susceptibility 263–269
Cold exposure
  airway obstruction, asthma 525–529
Cold storage
  muscle contractility, preservation solutions 271–278
Colon cancer
  fish oil, athymic mice 303–311
Colonic epithelium
  cell proliferation, butyrate enema 671–676
Colony forming units-fibroblastic
  osteogenesis, aging 549–555
Colour Doppler sonography
  venous thrombosis 657–661
Congestive heart failure
  adrenomedullin, natriuretic peptides 135–139
Cooling
  sickle cell disease, vascular response 111–120
Coronary arteries
  hypertension, acetylcholine 231–238
  myocardial hypertrophy, nitric oxide 141–147
  myogenic tone, nitric oxide 225–229
Coronary artery disease
  stromelysin expression, polymorphism 103–110*
  vitamin E, hypercholesterolaemia 129–134
Coronary disease
  low-density lipoprotein, \(\beta\)-blockers 573–578
Coronary flow reserve
  exercise capacity, dilated cardiomyopathy 485–492
Crohn's disease
  genetic susceptibility, major histocompatibility complex 473–478*
Cyclic GMP
  endothelium-dependent dilatation, Raynaud's disease 239–243
Cyclo-oxygenase
  myogenic tone, hypertension 225–229
Cytokeratins
  bronchoalveolar lavage fluid, interstitial lung disease 531–535

Decorin
  hypertrophic scar tissue, fibroblasts 541–547
Deep venous thrombosis
  strain-gauge plethysmography, duplex scanning 651–656
Deoxycorticosterone acetate-salt hypertension
  vasopressin receptors 517–523
Diabetes
  adolescents, cardiovascular reflexes 615–621
  bile-salt-dependent lipase, glycation 181–188
  cerebral dysfunction, lactate 157–163
  fat-soluble vitamins, dietary supplements 189–195
  genetic susceptibility, autoantibodies 263–269
  glomerular permeability, angiotensin-converting enzyme 165–173
  neurovascular stimulation, nutritive capillary blood flow 255–261
  oxidative stress, liver 623–632
  postprandial hypotension, gastric emptying 65–70
Diabetic nephropathy
  angiotensin-converting enzyme 165–173
  angiotensin-converting enzyme inhibitors, hypertension 511–516
  neurogenic inflammation, total skin blood flow 255–261
Dietary lipids
  tumour growth, colon cancer 303–311
Dietary supplements
  fat-soluble vitamins, diabetes 189–195
Dilated cardiomyopathy
  coronary flow reserve, exercise capacity 485–492
Diphenylhexatriene anisotropy
  membrane microviscosity, erythrocytes 79–85
Direct electrical stimulation
  muscle contractility, preservation solutions 271–278
Duplex scanning
  deep venous thrombosis, strain-gauge plethysmography 651–656

Elderly
  hypertension, baroreflex sensitivity 245–253
  lymphocytes, oxidative stress 447–452
  temperature, haemodynamics 493–498
Endoglin
  genetic mutation, haemorrhagic telangiectasia 207–218
Endothelial dysfunction
  vitamin E, hypercholesterolaemia 129–134
Endothelin-1
  hypertrophic cardiomyopathy, adrenomedullin 21–28
Endothelium-dependent relaxation
  coronary arteries, hypertension 231–238
  vascular smooth muscle, nitric oxide 225–229
Endothelium-dependent vasodilatation
  hypertension, noradrenaline 601–607
  Raynaud’s disease, nitric oxide 239–243
Endothelium-derived hyperpolarizing factor
  coronary arteries, hypertension 231–238
Endotoxin
  cirrhosis, nitric oxide 637–643
Energy expenditure
  thermogenesis, adrenaline 121–127
Epidermal growth factor
  hepatic injury, carbon tetrachloride 219–223
Erythrocytes
  L-arginine transport, heart failure 3–4, 43–48
  membrane microviscosity, hypertriglyceridaemia 79–85
E-selectin
  inflammatory response, circadian rhythm 537–540
Excitation–contraction coupling
  hypoxaemia, muscle fatigue 279–286
Exercise
  heart rate variability, aging 579–584
  sympathetic denervation, blood pressure 5, 49–55
Exercise capacity
  coronary flow reserve, dilated cardiomyopathy 485–492
Exercise-induced hypotension
  venous capacitance, hypertrophic cardiomyopathy 335–336, 339–346
Factitious hyperkalaemia
  blood specimens 101
Fasting
  autonomic failure, blood pressure 5, 49–55
Fat-soluble vitamins
  diabetes, dietary supplements 189–195
Fatty acids
  tumour growth, colon cancer 303–311
Fetal exposure
  low-protein diet, hypertension 337–338, 373–381
Fibroblasts
  hypertrophic scar tissue, decorin 541–547
Fish oil
  colon cancer, athymic mice 303–311
Flow-mediated dilatation
  Raynaud’s disease, body cooling 239–243
Free-radical production
  preterm infants, antioxidant status 197–201

Gas-exchange abnormality
  bronchial occlusion, pulmonary flow distribution 453–460
Gastric carcinoma
  mucins 87–99
Gastric emptying
  postprandial hypotension, diabetes mellitus 65–70
Gastrointestinal motility
  small intestine, 5-hydroxytryptamine 663–670
Gastrointestinal tract
  Crohn’s disease, genetic linkage 473–478*
  glutaminase distribution, glutamine synthetase 313–319
Gene expression
  adrenomedullin, cardiac hypertrophy 359–365
Gene transcription
  glucocorticoids, inflammation 557–572*
  vasopressin receptors, deoxycorticosterone acetate-salt hypertension 517–523
Genetic linkage
  inflammatory bowel disease, Crohn’s disease 473–478*
Genetic mutation
  adenosine deaminase deficiency, respiratory disease 207–218*
Genetic susceptibility
  Chron’s disease, major histocompatibility complex 473–478*
  diabetes, autoantibodies 263–269
Glomerular angiotensin-converting enzyme activity
  angiotensin-converting enzyme inhibitors, diabetic nephropathy 511–516
Glomerular permeability
  diabetes, angiotensin-converting enzyme 165–173
Glucocorticoids
  inflammation, gene transcription 557–572*
  prenatal exposure, hypertension 149–155
Glucose metabolism
  adipose tissue, lipolysis 71–77
Glucose tolerance test
  hypertension, insulin resistance 609–614
Glucose uptake
  N\textsuperscript{\textdegree}-monomethyl-L-arginine, nitric oxide synthase 175–180
Glutaminase distribution
  gastrointestinal tract, glutamine synthetase 313–319
Glutamine
  gastrointestinal tract, glutamine synthetase 313–319
Glutamine synthetase
  gastrointestinal tract, glutamine synthetase distribution 313–319
Glutathione peroxidase
  diabetes, oxidative stress 623–632
  oxidative stress, elderly 447–452
Glycation
  bile-salt-dependent lipase, albumin 181–188
Glycopolyptides
  gastric carcinoma 87–99
Granulocyte pool
  pulmonary circulation, lung 7–19*
Gut
  glutaminase distribution, glutamine synthetase 313–319

Haematopoiesis
  leptin, adolescents 633–636
Haemodialfiltration
  body mass index, leptin 431–435
Haemodialysis
  obesity, leptin 431–435
Haemodynamics
  portal hypertension, octreotide 645–650
  temperature, elderly 493–498
Haemorrhagic telangiectasia
  adenosine deaminase deficiency, polymorphism 207–218*
Head-up tilt
  temperature, haemodynamics 493–498
Heart failure
  adrenomedullin, gene expression 359–365
  L-arginine transport, erythrocytes 3–4, 43–48
  coronary flow reserve, exercise capacity 485–492
  natriuretic peptides, renin–angiotensin–aldosterone system 591–599
Heart muscle
  ATP synthase, mitochondrion 499–504
Heart rate variability
  aerobic exercise, aging 579–584
  chronic fatigue syndrome, blood pressure 57–63
  diabetes, adolescents 615–621

</table>
Isometric exercise
  hyperventilation, cerebral blood flow 353-358
  muscle sympathetic activity, adrenaline 383-393
Isosorbide dinitrate
  portal hypertension, haemodynamics 645-650

Kidney vasopressin receptors
  deoxycorticosterone acetate-salt hypertension, gene transcription 517-523

Lactate
  diabetes, cerebral dysfunction 157-163
Lactate extraction
  myocardial ischaemia, atrial pacing 29-34
Lactate metabolism
  skeletal muscle, carbohydrate ingestion 71-77
Lactation
  bone mineral density 405-412
Leptin
  acquired immunodeficiency syndrome, anorexia 479-483
  haematopoiesis, adolescents 633-636
  obesity, haemodialysis 431-435
Linkage studies
  adenosine deaminase deficiency, haemorrhagic telangiectasia 207-218*
Lipid
  cardiopulmonary bypass, oxygen 1, 35-41
Lipid-associated oxygen
  cardiac surgery, blood 1, 35-41
Lipid peroxidation
  coronary disease, β-blockers 573-578
  preterm infants, antioxidant status 197-201
Lipolysis
  adipose tissue, glucose metabolism 71-77
Lisinopril
  proteinuria, renal tubular injury 425-430
Liver
  oxidative stress, diabetes 623-632
Liver damage
  carbon tetrachloride, epidermal growth factor 219-223
Liver vasopressin receptors
  deoxycorticosterone acetate-salt hypertension, gene transcription 517-523
Loop diuretics
  natriuretic response, metabolic alkalosis 287-292, 687
Low-density lipoprotein
  oxidation, β-blockers 573-578
  peroxidation, myocardial ischaemia 29-34

Lung
  bronchial occlusion, pulmonary flow distribution 453-460
  granulocyte pool, pulmonary circulation 7-19*
Lymphocytes
  oxidative stress, elderly 447-452
Lympho-mononuclear cells
  cirrhosis, Nω-nitro-L-arginine methyl ester 637-643

Magnetic resonance spectroscopy
  muscle fatigue, hypoxaemia 279-286
Major histocompatibility complex
  Crohn's disease, genetic susceptibility 473-478*
Malnutrition
  tuberculosis, protein metabolism 321-331
Malondialdehyde
  antioxidant status, preterm infants 197-201
Maternal undernutrition
  hypertension, angiotensin-converting enzyme inhibitor 337-338, 373-381
Matrix deposition
  matrix metalloproteinases, atherosclerosis 103-110*
Matrix metalloproteinases
  vascular matrix remodelling, atherosclerosis 103-110*
Membrane microviscosity
  hypertension, calcium 79-85
Menstruation
  bone mineral density, pregnancy 405-412
Metabolic alkalosis
  bumetanide, natriuretic response 287-292, 687
Metabolic effects
  muscle fatigue, hypoxaemia 279-286
Methacholine
  cold exposure, asthma 525-529
Methylation
  protein, brain 677-685
Microalbuminuria
  angiotensin-converting enzyme, diabetes 165-173
Microspheres
  bronchial occlusion, pulmonary flow distribution 453-460
Migrating motor complex
  small intestine, 5-hydroxytryptamine 663-670
Mitochondrion
  ATP synthase, heart muscle 499-504
Nω-Monomethyl-L-arginine
  nitric oxide synthase, glucose uptake 175-180
  erythrocytes, heart failure 3-4, 43-48
Subject Index

Mucins
  gastric carcinoma  87–99
Muscle
  ATP synthase, mitochondrion  499–504
  Muscle contractility
    preservation solutions, ischaemia  271–278
  Muscle fatigue
    31P magnetic resonance spectroscopy, hypoxaemia  279–286
  Muscle sympathetic activity
    adrenaline, isometric exercise  383–393
Myocardial hypertrophy
  coronary arteries, nitric oxide  141–147
Myocardial infarction
  adrenomedullin, natriuretic peptides  135–139
  thromboxane, atrial pacing  29–34
Myoelectrical effects
  muscle fatigue, hypoxaemia  279–286
Myogenic tone
  coronary arteries, acetylcholine  231–238
  hypertension, nitric oxide  225–229
Natriuretic peptides
  adrenomedullin, myocardial infarction  135–139
  gene expression, heart failure  359–365
  heart failure, renin–angiotensin–aldosterone system  591–599
  hypertrophic cardiomyopathy, adrenomedullin  21–28
Natriuretic response
  metabolic alkalosis, bumetanide  287–292, 687
Necrotizing acute pancreatitis
  sodium taurocholate, zymogen granules  293–301
Neurogenic inflammation
  diabetes, total skin blood flow  255–261
Neuropeptide Y
  heart failure  591–599
Neurovascular stimulation
  diabetes, nutritive capillary blood flow  255–261
Neutrophil cathepsin G
  platelet–neutrophil adhesion, platelet P-selectin  437–445
Neutrophil priming
  immune response, superoxide anions  461–471*
Nitric oxide
  cardiopulmonary bypass, aprotinin  505–509
  cirrhosis, peripheral vascular resistance  637–643
  coronary arteries, endothelium-dependent relaxation  231–238
coronary arteries, myocardial hypertrophy  141–147
  endothelium-dependent dilatation, Raynaud’s disease  239–243
  insulin sensitivity, blood flow  175–180
  myogenic tone, hypertension  225–229
Nitric oxide synthase
  glucose uptake, N^6-monomethyl-L-arginine  175–180
N^6-Nitro-L-arginine
  coronary arteries, chronic ischaemic myocardial remodelling  141–147
N^6-Nitro-L-arginine methyl ester
  cirrhosis, nitric oxide synthase  637–643
Nitroprusside
  baroreflex sensitivity, blood pressure  245–253
  endothelial dysfunction, hypercholesterolaemia  129–134
Noradrenaline
  endothelium-dependent vasodilatation, hypertension  601–607
  hypertrophic cardiomyopathy, adrenomedullin  21–28
  insulin resistance, hypertension  609–614
Noradrenaline release
  muscle sympathetic activity, adrenaline  383–393
Nuclear factor κB
  glucocorticoids, gene transcription  557–572*
Nutrition
  haemodialysis, leptin  431–435
  nutritive capillary blood flow
    neurovascular stimulation, diabetes  255–261
Obesity
  leptin, haematopoiesis  633–636
  leptin, haemodialysis  431–435
  thermogenesis, cardiovascular response  121–127
Octreotide
  insulin resistance, hypertension  609–614
  portal hypertension, cirrhosis  367–371
  portal hypertension, haemodynamics  645–650
Orthostatic hypotension
  autonomic failure  347–352
Osteogenesis
  colony forming units-fibroblastic, aging  549–555
Osteoporosis
  aging, colony forming units-fibroblastic  549–555
Subject Index xxi

Oxidation
  low-density lipoprotein, β-blockers 573–578
Oxidative stress
  diabetes, liver 623–632
  lymphocytes, elderly 447–452
Oxygen
  cardiac surgery, plasma lipid 1, 35–41
Oxygen free-radicals
  diabetes, antioxidant enzymes 623–632

Painful crisis
  sickle cell disease, cooling 111–120
Pancreas
  oxidative stress, diabetes 623–632
Pancreatitis
  sodium taurocholate, zymogen granules 293–301
Peripheral vascular resistance
  nitric oxide, cirrhosis 637–643
Peroxidation
  myocardial ischaemia, low-density lipoprotein 29–34
Phenytoin
  baroreflex sensitivity, blood pressure 245–253
Phosphoinositide 3-kinase
  neutrophil priming, inflammation 461–471*
Phospholipase D
  neutrophil priming, inflammation 461–471*
Platelet–neutrophil adhesion
  platelet P-selectin, neutrophil cathepsin G 437–445
  platelet P-selectin
    platelet–neutrophil adhesion, neutrophil cathepsin G 437–445
Platelets
  vascular endothelial growth factor, blood clotting 395–404
Pneumonitis
  bronchoalveolar lavage fluid, cytokeratins 531–535
Polymorphism
  haemorrhagic telangiectasia, adenosine deaminase deficiency 207–218*
Portal hypertension
  cirrhosis, octreotide 367–371
  haemodynamics, octreotide 645–650
Portal hypertensive gastropathy
  cirrhosis, octreotide 367–371
Portal vein stenosis
  octreotide, hyperdynamic circulation 645–650
Postprandial hypotension
  gastric emptying, diabetes mellitus 65–70
Postural hypotension
  head-up tilt, temperature 493–498

Potassium
  blood specimens 101
Power spectral analysis
  diabetes, adolescents 615–621
  heart rate variability, chronic fatigue syndrome 57–63
Pregnancy
  bone mineral density 405–412
Prenatal exposure
  glucocorticoids, hypertension 149–155
Preservation solutions
  muscle contractility, ischaemia 271–278
Pressoreceptors
  baroreflex sensitivity, hypertension 245–253
Preterm infants
  antioxidant status, lipid peroxidation 197–210
Prostacyclin
  myocardial ischaemia, atrial pacing 29–34
Protein carboxymethylation
  brain 677–685
Protein diet
  fetal exposure, hypertension 337–338, 373–381
Protein metabolism
  infection, acute phase proteins 413–423
  tuberculosis, wasting 321–331
Protein oxidative damage
  elderly, oxidative stress 447–452
Protein synthesis
  sepsis, acute phase proteins 413–423
  tuberculosis, wasting 321–331
Proteinuria
  diabetes, angiotensin-converting enzyme 165–173
  renal tubular injury, lisinopril 425–430
Proteoglycans
  hypertrophic scar tissue, burns 541–547
Proximal tubular hypercatabolism
  proteinuria, lisinopril 425–430
P-selectin
  platelet–neutrophil adhesion, neutrophil cathepsin G 437–445
Pulmonary arteriovenous malformations
  linkage studies, haemorrhagic telangiectasia 207–218*
Pulmonary arteriovenous malformations
  linkage studies, haemorrhagic telangiectasia 207–218*
Pulmonary circulation
  granulocyte pool, lung 7–19*
Pulmonary flow distribution
  bronchial occlusion, blood gases 453–460
Pulmonary inflammation
  nitric oxide, aprotinin 505–509
Pyridoxal-5'-phosphate
  hypophosphatemia, alkaline phosphatase 203–206
Raynaud's disease  
nitric oxide, endothelium-dependent dilatation 239–243
Reflex venoconstriction  
hypertrophic cardiomyopathy, exercise-induced hypotension 335–336, 339–346
Renal response  
bumetanide 287–292, 687
Renal tubular injury  
proteinuria, lisinopril 425–430
Renin–angiotensin–aldosterone system  
heart failure, natriuretic peptides 591–599
Respiratory disease  
adenosine deaminase deficiency, polymorphism 207–218*
Respiratory sinus arrhythmia  
heart rate variability, aerobic exercise 579–584
Retinol  
diabetes, dietary supplements 189–195
Retinopathy of prematurity  
total antioxidant status, preterm infants 197–201
Sarcoidosis  
bronchoalveolar lavage fluid, cytokeratins 531–535
Sepsis  
protein synthesis, acute phase proteins 413–423
Serotonin  
small intestine, gastrointestinal motility 663–670
Shear stress  
endothelium-dependent dilatation, Raynaud’s disease 239–243
Sickle cell disease  
cooling, vascular response 111–120
Skeletal muscle  
glucose metabolism, lipolysis 71–77
isometric exercise, cerebral blood flow 353–358
Skin cooling  
airway obstruction, asthma 525–529
Small intestine  
5-hydroxytryptamine, gastrointestinal motility 663–670
Sodium excretion  
bumetanide, metabolic alkalosis 287–292, 687
Sodium taurocholate  
zymogen granules, pancreatitis 293–301
Spectrum analysis  
baroreflex sensitivity, hypertension 245–253
Stomach  
mucins, tumour 87–99
Strain-gauge plethysmography  
deep venous thrombosis, duplex scanning 651–656
Stroke volume  
orientation hypotension, autonomic failure 347–352
Stromelysin expression  
atherosclerosis, polymorphism 103–110*
Superoxide anions  
neutrophil priming, immune response 461–471*
Superoxide dismutase  
diabetes, oxidative stress 623–632
Thermogenesis  
adrenaline, energy expenditure 121–127
Thiobarbituric acid-reactive substances  
diabetes, oxidative stress 623–632
Thrombin  
platelet–neutrophil adhesion, platelet P-selectin 437–445
Thromboxane  
myocardial ischaemia, atrial pacing 29–34
Tocopherols  
diabetes, dietary supplements 189–195
endothelial dysfunction, hypercholesterolaemia 129–134
Total skin blood flow  
neurogenic inflammation, diabetes 255–261
Transforming growth factor β  
hypertrophic scar tissue, decorin 541–547
Transesophageal Doppler echocardiography  
coronary flow reserve, dilated cardiomyopathy 485–492
Transplantation  
muscle contractility, preservation solutions 271–278
Trimethylamino-diphenylhexatriene  
anisotropy 79–85
Trypsinogen  
zymogen granules, pancreatitis 293–301
Tuberculosis
  undernutrition, anabolic block  321–331
Tumour
  stomach, mucins  87–99
Tumour growth
  dietary lipids, colon cancer  303–311

Ulcerative colitis
  genetic linkage, Crohn’s disease  473–478*
Undernutrition
  tuberculosis, anabolic block  321–331
  tuberculosis, protein metabolism  321–331
Upper limb venous thrombosis
  colour Doppler sonography  657–661
Urokinase
  colonic epithelium, butyrate enema  671–676

Vascular endothelial growth factor
  platelets, blood clotting  395–404
Vascular matrix remodelling
  matrix metalloproteinases, atherosclerosis  103–110*
Vascular permeability factor
  platelets, blood clotting  395–404
Vascular resistance
  blood pressure, autonomic failure  347–352
  sickle cell disease, cooling  111–120
  Vascular smooth muscle
    myogenic tone, nitric oxide  225–229
  Vasoactive hormones
    heart failure, gene expression  359–365
  Vasoconstrictor
    endothelium-dependent relaxation, hypertension  231–238
  Vasodilatation
    hypertension, noradrenaline  601–607
  Vasopressin receptors
    deoxycorticosterone acetate-salt hypertension  517–523
  Venous capacitance
    hypotension, hypertrophic cardiomyopathy  335–336, 339–346
  Venous thrombosis
    colour Doppler sonography  657–661
  Vitamin B₆
    alkaline phosphatase, hypophosphatasia  203–206
  Vitamin E
    endothelial dysfunction, hypercholesterolaemia  129–134
  Wasting
    tuberculosis, protein metabolism  321–331
  Zymogen granules
    enzyme content, pancreatitis  293–301
