

# Clinical SCIENCE

C O N T E N T S

## COMMENT

### **The promise of improved drug delivery**

by K. J. O'Byrne and W. P. Steward (see accompanying paper pp. 171–178)

127–128

## PAPERS

### **Sustained elevation of plasma brain natriuretic peptide levels associated with progressive ventricular remodelling after acute myocardial infarction**

by N. Nagaya, Y. Goto, T. Nishikimi, M. Uematsu, Y. Miyao, Y. Kobayashi, S. Miyazaki, S. Hamada, S. Kuribayashi, M. Takamiya, H. Matsuo, K. Kangawa and H. Nonogi

129–136

### **Effect of $\beta$ -blockade on baroreceptor and autonomic function in heart failure**

by J. E. Sanderson, L. Y. Yeung, S. Chan, B. Tomlinson, R. Kay, K. S. Woo and L. Bernardi

137–146

### **Heart rate variability in 1-day-old infants born at 4330 m altitude**

by J. P. Mortola, F. León-Velarde, L. Agüero and P. B. Frappell

147–153

### **Altered small artery morphology and reactivity in critical limb ischaemia**

by C. Hillier, R. D. Sayers, P. A. C. Watt, R. Naylor, P. R. F. Bell and H. Thurston

155–163

### **Nitric oxide stimulates cyclic guanosine monophosphate production and electrogenic secretion in Caco-2 colonocytes**

by V. E. Rolfe and P. J. Milla

165–170

### **Survival of human carrier erythrocytes *in vivo***

by B. E. Bax, M. D. Bain, P. J. Talbot, E. J. Parker-Williams and R. A. Chalmers

171–178

### **Increased splanchnic blood flow after hypoglycaemia in diabetic and normal man: evidence against glucagon as a mediator**

by D. R. Parker, A. Bargiota, G. D. Braatvedt, M. Halliwell and R. J. M. Corrall

179–184

### **Change in tissue concentrations of lipid hydroperoxides, vitamin C and vitamin E in rats with streptozotocin-induced diabetes**

by F. Sun, K. Iwaguchi, R. Shudo, Y. Nagaki, K. Tanaka, K. Ikeda, S. Tokumaru and S. Kojo

185–190

### **Human obesity is associated with a chronic elevation in brain 5-hydroxytryptamine turnover**

by G. W. Lambert, M. Vaz, H. S. Cox, A. G. Turner, D. M. Kaye, G. L. Jennings and M. D. Esler

191–197

### **Pharmacokinetics of L-arginine during chronic administration to patients with hypercholesterolaemia**

by O. Tangphao, S. Chalon, H. Moreno Jr., B. B. Hoffman and T. F. Blaschke

199–207

**Isoaspartyl bond formation within N-terminal sequences of collagen type I: implications for their use as markers of collagen degradation**

by J. D. Brady, J. Ju and S. P. Robins

209–215

**CORRESPONDENCE**

**Acute hypertension impairs endothelium-dependent vasodilatation**

by S. M. Gardiner and T. Bennett

217–218

**SUPPLEMENT 40**

**Communications for the Autumn Meeting of the Medical Research Society on 12 and 13 November 1998 in conjunction with the Science and Medicine Conference at the Royal College of Physicians, London**

1P–11P
