

BIOSENSOR TECHNOLOGIES FOR DETECTION OF BIOMOLECULES

Introduction to biosensors	1
Nikhil Bhalla, Pawan Jolly, Nello Formisano and Pedro Estrela	
Antibodies and antibody-derived analytical biosensors	9
Shikha Sharma, Hannah Byrne and Richard J. O’Kennedy	
Non-antibody protein-based biosensors	19
Paul Ko Ferrigno	
Oligonucleotide-based systems: DNA, microRNAs, DNA/RNA aptamers	27
Pawan Jolly, Pedro Estrela and Michael Lodomery	
Glycan and lectin biosensors	37
Štefan Belický, Jaroslav Katrlík and Ján Tkáč	
Use of biosensors for the detection of marine toxins	49
Daniel A. McPartlin, Michael J. Lochhead, Laurie B. Connell, Gregory J. Doucette and Richard J. O’Kennedy	
Bioconjugation and stabilisation of biomolecules in biosensors	59
Susana Liébana and Guido A. Drago	
Electrochemical biosensors and nanobiosensors	69
Jules L. Hammond, Nello Formisano, Pedro Estrela, Sandro Carrara and Jan Tkac	
Biologically sensitive field- transistors: from ISFETs to NanoFETs	81
Vivek Pachauri and Sven Ingebrandt	
Optical biosensors	91
Pavel Damborský, Juraj Švitel and Jaroslav Katrlík	
Acoustic biosensors	101
Ronen Fogel, Janice Limson and Ashwin A. Seshia	
Lateral flow assays	111
Katarzyna M. Koczula and Andrea Gallotta	
Lab-on-chip systems for integrated bioanalyses	121
João Pedro Conde, Narayanan Madaboosi, Ruben R.G. Soares, João Tiago S. Fernandes, Pedro Novo, Geraud Moulas and Virginia Chu
